Habitat data were derived from 1:24,000 scale color-infrared photography obtained December 15, 2002. Habitat classes are based on "Classification of Wetlands and Deepwater Habitats of the United States, " (Cowardin and others 1979, FWS/OBS - 79/31) as modified for the National Wetlands inventory mapping conventions. The data were overlaid on a 2000 LANDSAT Thematic Mapper image.
