

# Little Vermilion Bay Sediment Trapping (TV-12)

## Coastal Wetlands Planning, Protection and Restoration Act

### 2009 Land-Water Classification

Because the work has not yet been approved for publication by the U.S. Geological Survey (USGS), it does not represent any official USGS finding or policy.

Class	Project Acres	Reference Acres
Land	54	115
Water	833	608
Tidal Flats	218	168
<b>Total</b>	<b>1,105</b>	<b>891</b>

**Data Information:**  
 The land-water data were obtained from 1:12,000 scale, color-infrared aerial photography acquired December 19, 2009. All areas characterized by emergent vegetation, wetland forest, scrub-shrub, or upland were classified as land, while open water and aquatic beds were classified as water. The 2009 data includes a mudflat classification because of tidal fluctuations resulting in mudflat exposure. The Reference Area represents a control as an effective means for evaluating a project's success.

**Prepared by:**  
 U.S. Department of the Interior  
 U.S. Geological Survey  
 National Wetlands Research Center  
 Lafayette, Louisiana  
 and  
 Coastal Protection and Restoration Authority of Louisiana  
 Lafayette Field Office

Scale = 1:35,000

**Federal Sponsor:**  
 National Marine Fisheries Service
