

Data Source:
 Habitat data were derived from 1:24,000 scale, color infrared photography. Photography was obtained December 18, 2001. Habitat classes are modified from "Classification of wetlands and deepwater habitats of the United States" (Cowardin and others, 1979). The habitat data is overlaid on a 1993 panchromatic SPOT image at 1:120,000 scale.
