

# East Delacroix Marsh Creation and Terracing (BS-37)

## Project Status

**Approved Date:** 2019      **Project Area:** 576 acres  
**Approved Funds:** \$41.2 M    **Total Est. Cost:** \$44.3 M  
**Net Benefit After 20 Years:** 306 acres  
**Status:** Engineering and Design  
**Project Type:** Marsh Creation  
**PPL #:** 28

## Location

This project is located in Region 2, Breton Basin, St. Bernard Parish.

## Problems

Hurricanes Katrina, Rita, and Ida caused the majority of wetland loss in the project area. Wind erosion and saltwater intrusion have resulted in loss of marsh vegetation and wetland soils. Marsh loss has increased exposure of Delacroix to flooding from the east/southeast. The 1984 to 2021 USGS loss rate is -1.64%/yr for the extended project boundary area.

Drone image of the marsh creation area facing northeast.

## Restoration Strategy

The project goal is to create and nourish approximately 414 acres of marsh and construct approximately 18,880 linear feet of terraces (approximately 15 acres) utilizing a layout to help protect the community of Delacroix.

Sediment would be hydraulically dredged from Lake Lery and placed in two confined disposal areas creating 350 acres of marsh and nourishing 64 acres of existing marsh. Two creation cells allow a channel for the existing pump station. Project features will include a terrace field and sediment retention terrace (SRT) that total 15 acres of created marsh. The terrace field will include 30 terraces totaling 15,000 linear feet. The SRT will extend to the northeast from the marsh creation cells and total 3,880 linear feet. The SRT will include two 50-foot gaps to allow passage of aquatic organisms and tidal flushing. Dewatering will occur behind the SRT to take advantage of sediment-laden water. The SRT will connect to the North Delacroix Marsh Creation and Terracing Project (BS-41) and be utilized in the same way. The side and crown of the terraces would be planted with appropriate bare root plants in one row per side and crown.

## Progress to Date

This project was approved for Phase I Engineering and Design in February 2019.

The project is on Priority Project List (PPL) 28.
