June 202

Terrebonne Bay Shore Protection Demonstration (TE-45)

Cost figures as of: July 2025

Project Status

Approved Date: 2001 Project Area: N/A
Approved Funds: \$3 M
Total Est. Cost: \$3 M

Net Benefit After 20 Years: N/A

Status: Completed

Project Type: Demonstration: Shoreline Protection

PPL#: 10

Location

The project is located along the northern shore of Lake Barre in Terrebonne Parish, Louisiana.

Problems

Erosion of bay shore marshes results in substantial losses of saline marsh allowing higher salinities and increased wave action to intrude northward, ultimately threatening low-salinity habitats at the northern ends of the area's interdistributary basins.

Restoration Strategy

Maintenance of shoreline integrity along Terrebonne Bay is a regional strategy in the Coast 2050 plan. Given the great linear distances involved in implementing this strategy, techniques less costly than traditional rip-rap armoring will likely be needed to effectively address this problem. This demonstration project would seek to demonstrate the cost and effectiveness of alternative shore protection methods including artificial oyster reefs. Each protection measure would be installed near or on marsh shorelines to provide wave-protection.

Three techniques have been chosen based on anticipated effectiveness and cost (gabion mats, concrete onshore armor units, and foreshore triangle units). Three replicates of each technique will be installed in random order as per Louisiana Department of Natural Resources monitoring personnel. To better assess the effect of the oyster reef techniques, monitoring will be conducted over an 8-year period, rather than the usual 5 years.

Installed Gabion Mats along the north shore of Lake Barre.

Progress to Date

The Feasibility and Preliminary Design Report was completed in November 2002. Techniques to be tested and final site selections were made at that time and were based on the surveys, geotechnical investigations and preliminary engineering and design presented in that report. Construction approval was granted in August 2003 with a notice to proceed dated August 22, 2007 and an actual start date of September 13, 2007. Project was completed in November 2007.

All structures and signs have been removed from the project site. CPRA and FWS are in the process of closing out all of the costs and budgeting issues associated with this project. This should be completed March/April 2021.

This project is on Priority Project List 10.

Installation of Gabion Mats (one of the three techniques being used on this project) along the north shore of Lake Barre.
