Lost Lake Marsh Creation and Hydrologic Restoration (TE-72)

Project Status
Approved Date: 2010  
Project Area: 7,312 acres
Approved Funds: $31.5 M  
Total Est. Cost:  
Net Benefit After 20 Years:  
Status: Construction
Project Type: Marsh Creation
PPL #: 19

Location
The project is located in the Terrebonne Basin, Terrebonne Parish, near the vicinity of Lost Lake.

Problems
Significant marsh loss has occurred between Lake Pagie to the point that little structural framework remains between the lake and Bayou DeCade. North and west of Lost Lake, interior marsh breakup has resulted in large, interior ponds where wind/wave energy continues to result in marsh loss.

Restoration Strategy
The original marsh creation feature consisted of approximately 465 acres around Lake Pagie, north of Bayou DeCade, and along the northwestern Lost Lake shoreline. A favorable construction bid allowed an initial 245-acre marsh creation expansion with a portion of the remaining construction funds. Additional funding from the Louisiana Department of Natural Resources, Louisiana Oil Spill Coordinator’s Office, and an overestimation of dredged material quantities allowed for further project expansion. The marsh creation restored/protected some key features of structural framework (i.e., lake rim and bayou bank) within the area and connected to one of the marsh creation cells recently constructed under the North Lake Mechant Landbridge Restoration Project (TE-44). In total, over 1,100 acres of marsh were created/nourished. In addition, 30,000 linear feet (26 acres) of terraces were constructed to reduce fetch in an area of deteriorated marsh north of Bayou DeCade.
