Existing Utility Owners and Pipe Elevations

Existing Utility Owners and Pipe Elevations

In 2004, CH2M HILL and T. Baker Smith, Inc., attempted to identify existing utilities that crossed Bayou Lafourche. After the general pipe locations were identified from maps, an attempt was made to locate the top of the pipeline on both shores and at the middle of the channel. The results of that study are shown in Table H-1. Also shown is the preliminary analysis conducted for the Phase 1 design of the approximate dredging depths and whether the surveyed pipe will require replacement to accommodate the excavation for the bayou.
