

Phase I Environmental Site Assessment Report

North Delacroix Marsh Creation Project Delacroix, St. Bernard Parish, LA

Prepared for: Louisiana Coastal Protection and Restoration Authority (CPRA) 150 Terrance Avenue 70802 Baton Rouge, LA

Prepared by: APTIM Environmental & Infrastructure, LLC 5690 DTC Blvd., Suite 600 Greenwood Village, CO 80111

> Project No. 631019767 Final May 2021

Phase I Environmental Site Assessment Report

North Delacroix Marsh Creation Project Delacroix, St. Bernard Parish, LA

Final May 2021

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in §312.10 of 40 CFR Part 312 and

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

APTIM Environmental and Infrastructure, LLC (APTIM), has completed a Phase I Environmental Site Assessment in conformance with the scope and limitations of the ASTM International Designation E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM Practice E1527) of the below listed property. The scope of services, findings, opinions and conclusions completed and presented by APTIM have been developed and expressed for the sole and exclusive use of the Louisiana Coastal Protection and Restoration Authority (CPRA) and its affiliates, and its investors and lenders.

Cited below is an overview of the project, including a summary of APTIM's significant findings:

Name / Address	Tax Key Parcels	Brief Legal / Deed Description / Comments
North Delacroix Marsh Creation Project Delacroix, St. Bernard Parish, LA 70085	Refer to Section 5.4.7	Due to the number of parcels that comprise the Property legal descriptions have not been provided.

"User" of this Report:	CPRA
Reason for requesting the Phase I ESA:	Pre-Construction Due Diligence
Date project authorized:	January 5, 2021
Date of Site Reconnaissance:	April 21, 2021

Property General Characteristics		
Issue	Comments	
Acreage, structure(s), and general improvements:	The Property is located approximately 20 miles southeast of downtown New Orleans near the community of Delacroix in St. Bernard Parish east of LA Highway 300. The Property covers 411 acres and consists of open water with marsh/swamp land. There are no structures or general improvements. The project is to recreate marsh lands on the Property to help protect Delacroix from flooding. Access to the Property is via boat only.	
Status or general operations:	None – the Property is open water with marsh/swamp land

Conclusions

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of the ASTM Practice E1527-13 of the North Delacroix Marsh Creation Project, Delacroix, St. Bernard Parish, LA 70085 (the "Property"). Any exceptions to, or deletions from, this practice are described in *Section No. 11.0* of this Report.

Recognized Environmental Conditions

This assessment has revealed no evidence of RECs in connection with the Property.

Controlled Recognized Environmental Condition

This assessment has revealed no evidence of controlled RECs in connection with the Property.

Historical Recognized Environmental Condition

This assessment has revealed no evidence of historic RECs in connection with the Property.

1.0 INTRODUCTION

1.1 Purpose

CPRA retained APTIM to conduct a Phase I Environmental Site Assessment (ESA) on the Property as described in *Section 2.1* of this Report.

The purpose of this Phase I ESA is to identify, to the extent feasible, recognized environmental conditions (RECs) in connection with the Property.

The American Society of Testing and Materials International ("ASTM"), a not-for-profit writing organization has set the industry standard for content and conducting a Phase I ESA as set forth in the ASTM International Designation: *E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM Practice E1527-05). In accordance with the United States Environmental Protection Agency ("USEPA") *Standards and Practices for All Appropriate Inquiries, Final Rule* (AAI Rule, 40 CFR Part 312) and by direct reference in *40 CFR* §*312.11(a)* the procedures of ASTM Practice E1527-13 may be used to comply with the requirements set forth in the AAI Rule. ASTM International defines the following related terms:

The term *recognized environmental condition* means (REC) the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to a release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not RECs.

The term *controlled recognized environmental condition* (CREC) is a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

The term *historical recognized environmental condition* (HREC) means a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release an HREC, the environmental professional (EP) must determine whether the past release is an REC at the time the Phase I ESA is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as an REC.

The term *de minimis condition* means a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* conditions are neither RECs nor CRECs.

The term *material threat* means a physically observable or obvious threat which is reasonably likely to lead to a release that, in the opinion of the EP, is threatening and might result in impact to public health or the environment. An example might include an aboveground storage tank (AST) system that contains a hazardous substance, and which shows evidence of damage. The damage would represent a material threat if it is deemed serious enough that it may cause or contribute to tank integrity failure with a release of contents to the environment.

The term *hazardous substance* is a substance defined as hazardous pursuant to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), 42 United States Code (U.S.C.) §9601(14), as interpreted by USEPA regulations and the courts.

The term *petroleum products* is defined as those substances included within the meaning of the petroleum exclusion to CERCLA 42 U.S.C. §9601(14), as interpreted by the courts and USEPA, that is: petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under subparagraphs (A) through (F) of CERCLA 42 U.S.C. §9601(14), natural gas, natural gas liquids, liquefied natural gas, and synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).

The term *vapor encroachment condition* (VEC) is defined as the presence or likely presence of chemicals of concern vapors (ASTM Guide E2600-10, Table X6.1) in the subsurface of the target property caused by the release of vapors from contaminated soil or groundwater or both either on or near the target property as identified by ASTM Designation E2600-10: *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*. (The presence of a VEC combined with additional information may be determined [at the discretion of the EP] to be associated with a REC in connection with the Property.)

APTIM's performance of the Phase I ESA utilizing practices that constitute all appropriate inquiry into the previous ownership and uses of the Property, consistent with good commercial

and customary practice, may allow the User to satisfy one of the requirements to qualify for the innocent landowner defense, contiguous property owner, or bona fide prospective purchaser liability limitations as stated in CERCLA (42 U.S.C. §9601[35], §9607[b][3], §9607[q], and §9607[r]).

1.2 Scope of Services

This Phase I ESA was performed and completed in general accordance with the ASTM Practice E1527-13. The scope of services for this Phase I ESA and the format of this Report generally follow the recommended table of contents as set forth in ASTM Practice E1527-13 Appendix X4.

The Phase I ESA was conducted by and reviewed by qualified environmental professionals meeting the education, training and experience requirements as set forth in 40 CFR §312.10(b). A description of the services performed by APTIM for the Phase I ESA consisted of the following tasks:

1.2.1 Task 1 – Records Review

This task consisted of the acquisition and review of reasonably ascertainable records in the evaluation of potential RECs during the existing and prior use, ownership, and occupancy of the Property. Specifically, this task included the following elements:

- A review of federal, state, tribal and/or local environmental databases (*i.e.*, Environmental Data Resources, Inc. [EDR] environmental database radius search report or equivalent);
- A review of topographic, geologic, hydrogeologic and aerial photographic maps to evaluate the physical setting and site characteristics;
- A review of street/city directories, aerial photographs, topographic maps, historical maps, and fire insurance maps (*i.e.*, Sanborns) to provide information relative to the use, ownership, and/or occupancy of the Property from the present, back to the Property's first developed use, or back to 1940, whichever is earlier;
- A review of available environmental reports and documentation prepared and provided by others; where applicable and available (*i.e.* user provided documentation);
- A review of available documents from county, tribal and/or state environmental regulatory agencies, where applicable and available (*i.e.* regulatory agency file review); and
- A review of available documents and records from the local regulatory units and agencies of government, where applicable and available, including but not limited to the following:
 - Local Fire Department;
 - Local Building Permit/Inspection Department;
 - Local Department of Health/Environmental Services;
 - Local Tax Assessor;

- Local/Regional Pollution Control Agency; and
- Local/Regional Water Quality Agency.

1.2.2 Task 2 – Vapor Encroachment Screening – Tier 1

This task consisted of the review of known or likely contaminated sites, and an evaluation of the sites for a potential vapor-phase contaminant migration condition to exist on or near the Property. The screening evaluation associated with this task was completed in general compliance with ASTM International Designation: *E2600-10: Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions* (ASTM Guide E2600-10) using Tier 1 Screening procedures and/or other scientific or industry standard methodologies.

1.2.3 Task 3 – Site Reconnaissance

This task consisted of a visual and/or physical site reconnaissance to evaluate the potential for RECs on or adjacent to the Property. A visual and/or physical evaluation of the properties in the general vicinity of the Property was also conducted from the Property or adjacent public thoroughfares during the Site reconnaissance.

1.2.4 Task 4 – Interviews

This task consisted of conducting and/or making reasonable attempts to conduct interviews with available current and/or former owners, operators, property managers, facility managers or occupants of the Property, and to obtain information regarding the historical uses, occupancy, and ownership of the Property. This task, if applicable, also consisted of interviews with representatives of federal, state, tribal or local units and agencies of government.

1.2.5 Task 5 – Report

Following completion of Tasks 1 - 4 identified above, APTIM prepared this Phase I ESA Report. The format of this Report generally follows the recommended table of contents as set forth in ASTM Practice E1527-13 Appendix X4.

This Report includes documentation to support the analysis, findings, opinions, and conclusions developed by APTIM. All sources, including those that revealed no findings, are sufficiently documented to facilitate reconstruction of the research at a later date. Deletions, deviations, and additions from the ASTM Practice E1527-13 standard, if any, are listed in detail.

1.3 Significant Assumptions

In performing this assessment and preparing this Report, APTIM made the following assumptions:

- Actual knowledge and information supplied by others is complete and accurate and has been provided in good faith;
- Information provided by local public record sources is complete and accurate;
- Information provided by the selected environmental records database vendor is complete and accurate; and
- Uses of the Property, as evidenced by historical records, remained substantially unchanged during periods for which no records are available.
- As part of the vapor encroachment screening process, APTIM conservatively and arbitrarily assumes the presence of petroleum hydrocarbons in a light non-aqueous phase (free-product), if applicable, when determining the revised/calculated distance and area of concern.
- No change in land use, construction, demolition, substantial renovation or additions are proposed or planned for the Property, at this time.
- Release incidents registered on USEPA and/or state environmental registries as having a "closed" status do not represent a direct environmental cleanup liability to the current owner or operator of the Property, at this time. The identification of continuing obligations and compliance therewith, if any, is beyond the purpose and scope of this assessment.

1.4 Limitations and Exceptions

No environmental site assessment or vapor encroachment screening can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a property. Performing a Phase I ESA in conformance with the ASTM Practice E1527-13 and a vapor encroachment screening in conformance with ASTM Guide E2600-10 is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions and vapor encroachment conditions to exist in connection with the Property, while recognizing reasonable limits of time and cost.

The information contained in this Report, including opinions and conclusions, is based on the information made available to APTIM during the time period of this assessment. Because the Report is based upon available information, some of its conclusions could be different if the information, upon which it is based, is determined to be false, inaccurate, or contradicted by additional information.

APTIM performed services, obtained findings, and developed opinions and conclusions in accordance with generally and currently accepted professional practices and standards governing recognized firms in the area, engaged in similar work.

APTIM makes no representation concerning the legal significance of its findings or the value of the Property investigation. APTIM has no contractual liability to third parties for the information or opinions in this Report.

Site and project-specific physical limitations and exceptions relative to User provided information, records reviews, interviews and/or site reconnaissance activities are discussed in detail within respective sections of this Report.

Other Federal, State, or Local Environmental Laws

The Phase I ESA was completed in conformance with the ASTM Practice E1527-13 and does not address any other requirements by state-specific or local environmental laws, if any, or any federal laws other than the all appropriate inquiry provisions and limited liability protections of the AAI Rule, 40 C.F.R., Part 312.

1.5 Special Terms and Conditions

This Phase I ESA has been completed in accordance with the APTIM proposal and requested scope of services outlined and specified in *Section 1.2* of this Report, and is to reasonable time and cost constraints and the terms, conditions and limitations declared in the associated and authorized *Proposal*, dated December 21, 2020.

The scope of the Phase I ESA and Report was developed by APTIM. No activity, including sampling, investigation, or evaluation of any material or substance may be assumed to be included, unless such activity is expressly considered and referenced in the scope of work and this Report. Maps and drawings in this Report are included only to aid the reader and should not be considered surveys or engineering studies.

The observations, findings, and opinions of APTIM are based on our professional judgment concerning the significance of the data gathered during the course of this assessment. Specifically, APTIM does not and cannot represent that the Property contains hazardous or toxic substances or other latent conditions beyond that observed and evaluated by APTIM during this assessment. The findings of the assessment are based on the professional judgment of APTIM, based in part on the information directly or indirectly provided by others as specified in this Report. APTIM does not warrant the accuracy or completeness of information and independent opinions, conclusions, recommendations provided by others, and assumes no responsibility for documenting conditions detectable with methods or techniques not specified in the scope of work. As previously noted, if conditions change or additional data becomes

available, the opinions, findings, and conclusions presented in this Report may require modification.

1.6 User Reliance

This document was prepared by APTIM ("Consultant") for the benefit of CPRA ("Agency"). With regard to any use or reliance on this document by any party other than Agency, Consultant, its parent, and affiliates: (a) make no warranty, express or implied, with respect to the use of any information or methodology disclosed in this document; and (b) specifically disclaims any liability with respect to any reliance on or use of any information or methodology disclosed in this document.

Any recipient of this document, other than Agency and its investors and lenders, by their acceptance or use of this document, releases Consultant, its parent, and affiliates from any liability for direct, indirect, consequential, or special loss or damage whether arising in contract, warranty, express or implied, tort or otherwise, and irrespective of fault, negligence, and strict liability of Consultant. This document was prepared based on information provided by Agency and the quality of the work product of Consultant is therefore contingent upon the accuracy, correctness, completeness and fitness for purpose of the information provided by Agency. Consultant makes no assurances, representations or warranty, express or implied, as to, or assumes any responsibility for the accuracy, correctness, completeness or fitness for purpose of any information provided by Agency.

٩N

Continued Viability

The viability of this Report is limited to the time limitations as set forth in ASTM Practice E1527-13 §4.6. This Report is presumed valid and may be used for the sole and exclusive use of CPRA and its investors and lenders if the date of the intended transaction is within 180 days of the completion date of this Report.

If the date of the intended transaction is beyond 180 days yet within one year of the completion date of this Report, the Report is presumed valid and may be used provided that the following components are updated:

- Interviews with owners, operators, and occupants;
- Searches for recorded environmental cleanup liens;
- Reviews of federal, tribal, state, and local government records;
- Reconnaissance of the Property and adjoining properties; and
- A declaration by the environmental professional responsible for the assessment or update.

Third Party Reliance and Reliance Letters

In the event that third-party reliance is requested, a reliance letter will be issued under separate cover. Third-party entity(ies) may only rely on the Phase I ESA Report to the same terms and conditions of the original contact; provided, however, APTIM's total aggregate liability from any causes or claims whatsoever both to the third-party entity(ies) and CPRA and its investors and lenders, shall be limited to the amount stated in the contract; provided, however, APTIM's total aggregate liability from any causes or claims whatsoever both to the third-party entity(ies) and CPRA and its investors and lenders, shall be limited to the amount stated in the contract; provided, however, APTIM's total aggregate liability from any causes or claims whatsoever both to the third-party entity(ies) and CPRA and its investors and lenders, shall be limited to the amount stated in Contract No. 4400017001 between Aptim Environmental, LLC and CPRA.

2.0 SITE DESCRIPTION

3.0 USER PROVIDED INFORMATION

In accordance with ASTM Practice E1527-13 §6, the user of a Phase I ESA Report has specific obligations for performing tasks during the assessment process that will help identify the possibility of RECs in connection with the Property. These tasks (e.g., chain-of-title, environmental lien and activity use limitations research, fair market valuations) do not require the technical expertise of an environmental professional and are generally not performed by the environmental professional unless added by a change in scope of work. Furthermore, these tasks may not be material to the identification of RECs in connection with the Property.

The Property contact information, known history, and environmental information was obtained by the administration of the APTIM *User Questionnaire*, derived in part from the ASTM Practice E1527-13, Appendix X3, and ASTM Guide E2600-10, Appendix X3. The *User Questionnaire* is provided in <u>Appendix C</u>.

User Provided Information	
Issue	Comments
Title Records	No recorded land title records were provided for review by the User/Client. APTIM did not perform a review or evaluation of land title records as part of this assessment. A list of Property owners is provided in Section 5.4.7.
Environmental Liens	User/Client was not aware of any environmental liens associated with the Property.
	As part of this assessment, APTIM obtained an <i>ERIS Environmental Lien Search Report</i> . No environmental liens were on record. Additional details are provided in <i>Section 5.4.1</i> .
Activity and Land Use Limitations	With the exception of general municipal zoning and associated land use limitations, the User/Client was not aware of any environmental related activity and land use limitations associated with the Property.
	As part of this assessment, APTIM obtained an <i>ERIS Environmental Lien Search Report</i> . The Grant Deed contained in the report did not reference an environmental restriction. Additional details are provided in <i>Section 5.4.1</i> .
Specialized Knowledge or Experience	User/Client had no specialized knowledge or personal experience with the Property.
Commonly Known or Reasonably Ascertainable Information	User/Client was not aware of any commonly known or reasonably ascertainable information.
Valuation Reduction for Environmental Issues	The Property is not known to be subject to a valuation reduction for any known environmental conditions. APTIM did not perform a review or evaluation of property assessment or valuation records as part of the Phase I ESA.
Owner / Property Manager /	Owners – Refer to Section 5.4.7
Occupant Information	Property Manager – None
	Occupant – None

Environmental Litigation, Administrative Proceedings or Regulatory Issued Violations	No pending, threatened or past litigation relevant to hazardous substances or petroleum products in, on, or from the Property are known or were provided.			
	No pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the Property are known or were provided.			
	No pending, threatened or past notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products are known or were provided.			
Property plans / site layouts / descriptions:	No property plans/ site layouts/ descriptions were provided by the user.			
Previous Environmental Reports – Property	No previous environmental reports were provided by the user.			

7

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

4.0 PREVIOUS ENVIRONMENTAL REPORTS

No previous environmental reports were provided to Aptim.

5.0 RECORDS REVIEW

5.1 Standard Environmental Record Sources

Environmental Data Resources (EDR) completed an environmental regulatory database search for the Property and properties within respective ASTM approximate minimum search distances. The *EDR Radius Map*TM *Report with GeoCheck*® (Database Report) including the date the report was prepared, the date the information was last updated, and the definition of databases searched, is provided in <u>Appendix B</u>.

Regulatory Database Assessment Criteria – Methodology and Limiting Conditions

In accordance with ASTM Practice E1527-13, §8.2.2, if the Property or adjoining properties are identified within standard environmental record sources (i.e., regulatory database search), pertinent and associated regulatory agency files or records should be reviewed. If, in the EP's opinion, such a review is not warranted, the EP must explain the justification for not conducting the file or records review. As an alternative, the EP may review files or records from an alternative source (for example, on-site records, User-provided records, records from local government agencies, interviews with regulatory officials or other individuals knowledgeable about the environmental conditions that resulted in the standard environmental record source listing, etc.).

Vapor Encroachment Screening – Tier 1 – Methodology and Limiting Conditions

APTIM reviewed the environmental database records identified in the Database Report and evaluated each reported site relative to a vapor encroachment condition, respective of the chemicals of concern, the distance that contaminants are likely to migrate based on local geological and hydrological conditions, sub-grade utility corridors and preferential pathways, structural components, mitigation devices, and other reasonable factors.

The vapor encroachment screening was completed in general compliance with *ASTM International Designation: E2600-10: Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions* (ASTM Guide E2600-10) using Tier 1 Screening procedures. In addition, based on the inferred or known groundwater gradient as specified within this Report, APTIM adopted and implemented a reduced radius area of concern distance as calculated, suggested and published by Buonicore, A.J., *A Smaller Intrusion*, Pollution Engineering, p26-31, May 2009.

5.1.1 On-Site Environmental Regulatory Listings

The Property was not identified in any of the databases searched by EDR.

5.1.2 Off-Site Environmental Regulatory Listings

Regulatory Listing	Facility Name/Address	Distance / Direction	*Gradient	Federal / State ID	APTIM Opinion
SWF/LF DEBRIS	St. Bernard Parish – Old Woodlake Landfill Debris Highway 300 Reggio, LA 70085	300 feet/West	Up-Gradient	Facility ID: 133061	Not a REC

Off-Site Environmental Regulatory Listing

Regulatory Status: N/A

Discussion: According to the Database Report this facility was pre-approved emergency debris site under the state's solid waste program from 2008-2019. Activities at this facility included construction and demolition staging, electronic waste staging, vegetative burning, vegetative chipping/grinding, vegetative staging, white goods staging, and wood waste staging. Because there is no evidence of hazardous waste disposal or a release from the facility that impacted the Property, this facility does not represent a REC in connection with the Property.

The Database Report identifies additional federal, state, tribal, and/or local sites located off-Property and within respective ASTM minimum search distances. A complete listing of databases, distances, the definition of databases searched, and reported sites within respective ASTM search distances is provided in <u>Appendix B</u>.

5.1.3 Orphan/Non-Locatable Site Listings

The Database Report did not find any geographic locations that could not be pinpointed because of insufficient information on the address.

5.2 Additional Environmental Record Sources

The Database Report identifies numerous additional and supplemental federal, state, tribal, or local databases which are beyond the standard environmental record sources required by ASTM Practice E1527-13 §8.2.1. A complete listing of additional and supplemental databases, distances, the definition of databases searched, and reported sites within respective ASTM search distances is provided in <u>Appendix B</u>.

No offsite properties were identified in supplemental and additional databases searched by EDR.

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

5.3 Physical Setting and Sources

Standard Physical Setting Source			
lssue	Comments		
Topography: (see <u>Figure 1</u>)	The elevation of the Property is zero feet above mean sea level. The Property itself is flat. Overall regional topography slopes generally to the west. Additional improvement and development characteristics are provided in Section 5.4.5 of this Report.		

Source: EDR GeoCheck® Physical Setting Source Summary

In accordance with ASTM Practice E1527-13 §8.2.3 one or more additional physical setting sources may be obtained at the discretion of the environmental professional; however, additional physical setting sources are required to be obtained and reviewed when: 1) conditions have been identified in which hazardous substances or petroleum products are likely to migrate to the Property or from or within the Property into the groundwater or soil; and 2) more information is generally obtained, pursuant to local good commercial or customary practices in initial environmental site assessments in the type of commercial real estate transaction involved, in order to assess the impact of such migration of RECs in connection with the Property.

NA, NA · · Final · May 2021 · NA

Discretionary and Non – Standard Issue	Comments			
Geology / Bedrock description:	The geologic rock stratigraphic unit for the Property is listed as being developed during the Holocene Series and Quaternary System of the Cenozoic Era.			
Soil description and permeability:	Soil Component Name:	Lafitte		
	Soil Texture:	Muck		
	Soil Permeability / Hydrologic Group:	D - Soils in this group have slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.		
	Soil Drainage:	Very poorly drained		
	Corrosion Potential – Uncoated Steel:	High		
	Other Information	Not Reported		
Hydrogeology: (depth to groundwater and gradient)	There is was no information regarding depth to groundwater and gradient.			

Source: EDR GeoCheck® Physical Setting Source Summary

5.4 Historical Use Information

The objective of consulting historical sources is to develop a history of previous uses of the Property and surrounding area in order to identify conditions material to the identification of RECs in connection with the Property, if any. In accordance with ASTM Practice E1527-13

§8.3.2 all obvious uses of the Property are required to be identified from the present, back to the Property's first developed use (developed use includes agricultural), or back to 1940, whichever is earlier. The review of respective historical sources requires reviewing of only as many of the standard historical sources (pursuant to ASTM Practice E1527-13 §8.3.4 which includes aerial photographs, fire insurance maps, property tax files, recoded land title records topographic maps, local street directories, building department records, zoning/land use records) as necessary and both reasonably ascertainably and likely to be useful.

5.4.1 Environmental Lien and Activity Use Limitations

EDR completed a search for environmental liens, activity and use limitations, and other environmental encumbering instruments recorded on the Property. The EDR Environmental Lien and AUL Search report, which includes the most recent deed and legal description is provided in Appendix D. The Grant Deed, which was included as an attachment to the report, did not reference environmental restrictions on the Property.

5.4.2 Chain-of-Title

APTIM did not complete a search of recorded land title records as part of this assessment. No chain-of-title was provided for review.

5.4.3 Aerial Photography

ERIS completed searches of aerial photographic maps for the Property. The EDR Aerial Photo Decade Package report, which includes the respective map, date, scale and source, is provided in Appendix E. Due to the scale and resolution of aerial photographs provided by EDR, specific site features are difficult to discern in certain photographs.

The following observations are noted:	

Year	Source	Description		_
		Property	The Property appears to be marsh/swamp land. No structures are present.	_
1956	EDR	Surrounding Area	The Surrounding Area is primary marsh/swamp land. A road is located to the west along Bayou Terre Aux Boeuf. Several small structures are located on the east side of the road. These structures are likely residential or cabins. A canal forms the northern Property boundary.	
1005 1000		Property	No significant changes to the Property.	The Property may ha quality).
1965-1998	EDR	Surrounding Area	No significant changes to the surrounding areas.	No significant chang present to the south

2007-2017	EDR	Property	The amount of open water compared to the marsh/swamp land has significantly increased. No structures are present.
		Surrounding Area	No significant changes to the surrounding areas.

Source(s): EDR Aerial Photo Decade Package, Google Earth

Listings in **bold** identify environmentally suspect characteristics or usage, which combined with additional information may be determined (at the discretion of the environmental professional) to be associated with a REC in connection with the Property.

5.4.4 Fire Insurance Maps

EDR conducted a search for fire insurance maps but the Property is unmapped. The EDR *Certified Sanborn*® *Map Report* is provided in <u>Appendix F</u>.

5.4.5 Topographic and Historical Maps

ERIS completed a search of public and private topographic and historical maps for the Property. The *EDR Historical Topo Map Report* including respective map names and dates is provided in <u>Appendix G.</u>

The following observations are noted:

Fopographic and Historical Map Review				
Year	Source	Description		
1892, 1893	EDR	Property	The Property appears undeveloped. A possible unpaved road or levee is present for a short distance on the western portion of the Property.	
		Surrounding Area	The possible unpaved road or levee is shown to the west of the Property followed by Bayou Terre Aux Boeuf. No other structures are present in the surrounding area.	
1910 EDR		Property	No significant changes since the 1893 map.	
		Surrounding Area	No significant changes since the 1893 map.	
1935	EDR	Property	The Property is depicted as a marsh or swamp.	
		Surrounding Area	LA State Highway 300 appears to the west of the Property. Scattered small structure, presumably residences or cabins, are located along the highway to the west, north and south. Jacks Canal is located along the northern Property border.	
1939	EDR	Property	The Property is not mapped.	
		Surrounding Area	The Surrounding Area is not mapped.	
1941-1967	EDR	Property	No significant changes since the 1935 map.	
		Surrounding Area	No significant changes since the 1935 map.	
1969	EDR	Property	No significant changes since the 1935 map.	
		Surrounding Area	Two drill holes are shown to the east and south of the Property. No other significant changes.	

Year	Source	e Description	
972-1983	EDR	Property	No significant changes since the 1969 map.
		Surrounding Area	No significant changes since the 1969 map.
1994	EDR	Property	The Property is not mapped.
		Surrounding Area	The Surrounding Area is not mapped.
2016	EDR	Property	The Property is depicted with numerous bodies of water and connecting streams.
		Surrounding Area	The Surrounding Area is depicted with numerous bodies of water and connecting streams. No structures are shown on the map.

Source: EDR Historical Topo Map Report

Listings in **bold** identify environmentally suspect characteristics or usage, which combined with additional information may be determined (at the discretion of the environmental professional) to be associated with a REC in connection with the Property.

5.4.6 Street / City Directories

ERD completed searches of business directories including city, cross-reference and telephone directories for the Property and adjacent properties. The *EDR-City Directory Image Report*, including the respective addresses, dates, and sources is provided in <u>Appendix H</u>.

There were no listings for the Property and Adjacent/Surrounding Properties. The report includes listings for Pakenham Drive, which is located in the city of Chalmette and is not the Property nor the surrounding area.

5.4.7 Local Record Sources

APTIM made reasonable attempts to obtain and review local records and information within the scope and time constraints of this assessment; however, in some instances, records and/or information requested may not have been received from the source at the time of Report publication.

As set forth in ASTM Practice E1527-13 §8.1.4.2 records and information that is reasonably ascertainable means information that is publicly available, that is obtained from its source within reasonable time and costs constraints, and that is practically reviewable. Reasonable time and costs are further defined as information being provided (either for in-person review, electronic review, or photo copies) by the source within 20 calendar days of receiving a written, electronic mail, telephone, or in-person request (*i.e.*, Freedom of Information Act Request) at no more than a nominal cost intended to cover the source's cost of retrieving and duplicating the information.

Listings in **bold** identify an environmentally suspect characteristic or usage associated with the Property, which combined with additional information may be determined (at the discretion

of the environmental professional) to be associated with a REC in connection with the Property.

Property Tax Records and Maps / Assessor Department Records			
Agency Name/Address/Number	Description of Records / Comments

NA, NA · · Final · May 2021 · NA

Planning / Zoning Department Records

Agency Name/Address/Email	Description of Rec	ords / Comments	
St. Bernard Planning & Zoning	Property	A-1 (Rural)	
Division 8201 W Judge Perez Drive Chalmette, LA 70043 504-278-4200	Surrounding Area	A-1 (Rural)	
http://www.sbpg.net/154/Plannin g-Zoning-Division http://www.sbpg.net/331/GIS- Maps-Data-Portal			

In accordance with ASTM Practice E1527-13 §8.2.2 and §11.5, to enhance and supplement the standard environmental record sources, additional environmental record sources shall be checked when, in the judgment of the environmental professional such additional records are: 1) are reasonably ascertainable; 2) are sufficiently useful, accurate, and complete in light of the objective of the records review; and 3) are generally obtained, pursuant to local good

commercial or customary practice, in initial environmental site assessments in the type of commercial real estate transaction involved. APTIM obtained and/or reviewed the following additional environmental records:

Agency Name/Address/Number	Description of Records	
St. Bernard Parish 8201 W Judge Perez Drive Chalmette, LA 70043 504-278-4200 http://sbpg.net	APTIM reviewed code enforcement actions, GIS maps and the data portal for information related to the Property and did not find any environmental concerns.	

State Agency			
Agency Name/Address/Number	Description of Records		
Louisiana Department of Environmental Quality EDMS <u>http://edms.louisiana.gov/app/doc/q</u> <u>uerydef.aspx</u>	APTIM performed a search of the Property addresses in the Electronic Document Management System. No records were found for the Property or adjacent properties.		

U.S. Environmental Protection Agency			
Agency Name/Address/Number	Description of Records/Comments		
USEPA Envirofacts Database https://www3.epa.gov/enviro/	APTIM performed a multisystem search of the Property addresses in the database. The search resulted in zero returns for the Property.		

5.4.8 Other Records and Historical Sources

No other historical sources such as community organizations, historical societies, local libraries, newspaper archives, internet sites, miscellaneous maps, etc. were reasonably ascertainable and/or as determined by the environmental professional, provided material information relative to RECs in connection with the Property.

5.4.9 Data Failure

Data failure occurs when all of the standard historical sources as set forth in ASTM Practice E1527-13 §8.3.1 through 8.3.2.2 that are reasonably ascertainable and likely to be useful have been reviewed, yet all obvious uses of the Property from the present, back to the Property's first developed use, or back to 1940, whichever is earlier have not been identified or delineated.

APTIM reviewed standard historical sources as determined by ASTM that were reasonably ascertainable and likely to be useful. APTIM did not encounter any data failures associated with historical research.

6.0 SITE RECONNAISSANCE

Site Assessor(s)				
Date	Environmental Professional(s)	Company Name / Address / Number		
April 21, 2021	Devin Oehler Matthew Sevier	APTIM 4171 Essen Lane – 3 – M Baton Rouge, LA 70809		
Weather Conditions:	∼75ºF, Sunny			

Representative(s) Escorting the Site Assessor				
Name / Title	Company Name / Address / Number	Years Associated with Property		
None	N/A	N/A		

6.1 Methodology and Limiting Conditions

APTIM used the following methodology to observe the Property during the site reconnaissance:

- Confirmed the definition of the Property boundaries, if available and delineated;
- Traversed the outer Property boundary, if delineated and discernible;
- Traversed transects across the Property;
- Traversed the periphery of all structures and features on the Property; and
- Visually assess accessible interior common areas; operations, maintenance, and repair areas; utility areas; and a representative sample of occupant spaces.

APTIM did not look under floors, above ceilings, behind walls, or at other areas where gaining access may have required destructive techniques or presented unique health and safety concerns.

6.2 General Site Setting

The Property and surrounding property characteristics have been discussed in detail within *Section 2.0* of this Report.

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

Storage Tanks / Other Features 6.3

6.3 Storage Ta	nks / Other Features	PHASE
APTIM made the follo	wing observations during the site reconnaissance:	_
Storage Tanks / Features		ENVIRONMENTAL
lssue	Comments	NTAL
Existing USTs	None observed	SITE A
Former USTs	None observed	ASSESSMENT REPORT
Existing ASTs	None observed	SMEN
Former ASTs	None observed	TREP
Other Features (<i>i.e.</i> , oil-water separators, reservoirs, hydraulic lifts or vaults)	None observed	ORT

NOTE: APTIM's assessment of ASTs and USTs included interviews with the Property Owner / Operator and visually apparent observations including repairs to pavement, vent pipes, ancillary equipment, and fill ports; as well as a review of reasonably ascertainable local and state records relating to current and historical operations and heating fuel sources.

Exterior Observations 6.4

Exterior Observations	
lssue	Comments
Septic System	None observed
Hazardous Substances	None observed
Hazardous Waste	None observed
Petroleum Products	None observed
Other Drums or Containers	None observed
Solid Waste	None observed
Wells	None observed
Wastewater	None observed
Storm Water	The Property is covered by open water and marsh/swamp land. There are no storm water control structures.
Drains or Sumps	None observed
Odors	None observed

Exterior Observations		
lssue	Comments	
Polychlorinated Biphenyl (PCB)- Containing Equipment	Туре	Comments / Age / Ownership
	Transformers / Electrical Equipment (fluid-containing)	None observed
	Hydraulic Equipment	None observed
	Other	None observed
Pools of Liquid	The Property is cove	ered by open water and marsh/swamp land
Pits, Ponds or Lagoons; the Property	The Property is cove	ered by open water and marsh/swamp land
Pits, Ponds or Lagoons; Adjoining Properties	The Adjoining Properties to the north, south and east are covered by open water and marsh/swamp land	
Stained Soil or Pavement	None observed	
Stressed Vegetation	None observed	
General Exterior Housekeeping		astic holding tank was observed floating on the water near the SW corner re was no evidence of a sheen or a release from the tank.

6.5 Interior Observations

There are no structures on the Property; therefore, this section is not applicable.

6.0 SITE RECONNAISSANCE

7.0 INTERVIEWS

The objective of interviews is to obtain information indicative or material to the identification of RECs. In accordance with ASTM Practice E1527-13 §10.7.2 if the environmental representative conducting the interview(s) asks questions of a person other than the User/Client but does not receive answers or receives partial answers, the Phase I ESA shall not thereby be deemed incomplete, provided that: 1) the questions have been asked (or attempted to be asked) in person, by electronic mail, or by telephone and written records have been kept of the person whom the questions were addressed and the response; or 2) the questions have been asked in writing sent by first class mail or by private, commercial carrier and no answer or incomplete answers have been obtained and at least one follow up (telephone or written request) was made again asking for responses.

APTIM interviewed the following individuals/entities in an effort to obtain information regarding the historical uses and occupancy of the Property and adjacent properties.

A summary of provided information is presented below:

Interviews with Past / Present Owner(s)	
Name / Agency / Address / Number	Comments
N/A	Due to the number of individual owners and the lack of any structures being on the Property or historical uses, Aptim did not interview any past/present owners.

7.1 Interviews with Past / Present Owner(s)

7.2 Interviews with Past / Present Site Manager(s)

Interviews with Past / Present Site Manager(s)	
Name / Agency / Address / Number	Comments
N/A	There are no past/present site managers associated with the Property.

7.3 Interviews with Past / Present Occupant(s)

Interviews with Past / Present Occupant(s)

Name / Agency / Address / Number	Comments
N/A	There are no past/present occupants associated with the Property.

NA, NA • • Final • May 2021 • NA

Interviews with Local Government Officials 7.4

Name / Agency / Address / Number	Comments
Other Agencies of Government	Environmental records/permits associated with the Property and acquired from respective government regulatory agencies have been discussed in detail within <i>Section 5.0</i> of this Report.

7.5 Interviews with Others / Abandoned Property Interviews

Interviews with Others or Owner / Occupant of Neighboring Properties	
Name / Agency / Address / Number	Comments
N/A	No interviews with others or owner/occupant of neighboring properties were completed.

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

8.0 FINDINGS

This assessment has revealed the following findings associated with the Property:

8.1 On-Site Environmental Conditions

On-Site Environmental Conditions	
Location	Issue / Concern / Comments
Property	No on-site environmental conditions were identified.

8.2 Off-Site Environmental Conditions

Off-Site Environmental Conditions	
Location	Issue / Concern / Comments
Surrounding Area	No off-site environmental conditions were identified.

OPINIONS 9.0

It is understood that CPRA intends to use the Property for marsh recreation. As such, APTIM has developed the following opinions relating to the known environmental and business environmental risks on the Property:

9.1 **On-Site Environmental Opinions**

On-Site Environm	On-Site Environmental Opinions	
Location	Issue / Concern / Comments	
Property	The <i>EDR Radius Map</i> [™] <i>Report with GeoCheck</i> ® identified six (6) oil or gas wells either within or adjacent to the Property. The status for all the wells was noted as "dry and plugged" in the report. CPRA should ensure that the wells will not be impacted by project activities.	

Off-Site Environmental Opinions 9.2

Location	Issue / Concern / Comments
Surrounding Properties	Based on the findings of this assessment, APTIM does not have additional opinions regarding the surrounding property environmental findings, which warrant further discussion or clarification. No RECs associated with off-site Properties have been identified.

9.3 Vapor Encroachment Screening Opinions

Based on the findings of this assessment and pursuant to the ASTM International's E 2600-10, Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transaction – Tier 1 Screening process, it is the opinion of APTIM that a vapor encroachment condition does not exist for the Property.

9.4 Historical Recognized Environmental Conditions (REC)

It is the opinion of APTIM that this assessment has not revealed any evidence of a historical REC conditions associated with the Property.

9.5 De Minimis Environmental Conditions

The ASTM term de minimis is defined and characterizes conditions that generally do not present a threat to human health or the environment and that generally would not be subject of an enforcement action if brought to the attention of appropriate governmental agencies.

It is the opinion of APTIM that this assessment has not revealed any evidence of *de minimis* conditions associated with the Property.

10.0 CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of the ASTM Practice E1527-13 of the North Delacroix Marsh Creation Project, Delacroix, St. Bernard Parish, LA 70085 (the "Property"). Any exceptions to, or deletions from, this practice are described in *Section No. 11.0* of this Report.

Recognized Environmental Conditions

This assessment has revealed no evidence of RECs in connection with the Property.

Controlled Recognized Environmental Condition

This assessment has revealed no evidence of controlled RECs in connection with the Property.

Historical Recognized Environmental Condition

This assessment has revealed no evidence of historic RECs in connection with the Property.

11.0 DEVIATIONS AND DATA GAPS

11.1 Deviations

Deviation from ASTM Practice E1527-13 included:

• A chain-of-title review was not conducted in accordance with ASTM Practice 1527-13 §6.2 and §8.3.4.4 as part of this assessment.

It is APTIM's opinion that the above-mentioned deviation does not affect the conclusions of this Report.

11.2 Data Gaps

Data failure associated with the review of reasonably ascertainable standard historical sources to determine the previous uses of the Property from the present to the first obvious developed use, or back to 1940, whichever is earlier, is one type of data gap. Other types of data gaps may include the lack of or inability to complete or obtain required information such as a site reconnaissance, standard historical sources, or interviews.

A data gap is only significant if: 1) upon the review of various information sources, inconsistent and incongruous information is revealed; and 2) in the opinion of the environmental professional the inconsistent/incongruous information warrants or raises reasonable concern. No data gaps were encountered during this assessment.

12.0 REFERENCES

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental St Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2020 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc., or its affiliates, is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in *bold italics* are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environmental Quality's Louisiana's Solid Waste Facilities list.

A review of the SWF/LF list, as provided by EDR, and dated 09/02/2020 has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

NO SITES FOUND

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/28/2020 Date Data Arrived at EDR: 11/05/2020 Date Made Active in Reports: 11/25/2020 Number of Days to Update: 20 Source: EPA Telephone: N/A Last EDR Contact: 01/14/2021 Next Scheduled EDR Contact: 04/12/2021 Data Release Frequency: Quarterly

NPL Site Boundaries

EPA Region 3 Telephone 215-814-5418

EPA Region 4 Telephone 404-562-8033

EPA Region 5 Telephone 312-886-6686

EPA Region 10 Telephone 206-553-8665 EPA Region 6 Telephone: 214-655-6659

EPA Region 7 Telephone: 913-551-7247

EPA Region 8 Telephone: 303-312-6774

EPA Region 9 Telephone: 415-947-4246

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/28/2020 Date Data Arrived at EDR: 11/05/2020 Date Made Active in Reports: 11/25/2020 Number of Days to Update: 20 Source: EPA Telephone: N/A Last EDR Contact: 01/14/2021 Next Scheduled EDR Contact: 04/12/2021 Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991 Date Data Arrived at EDR: 02/02/1994 Date Made Active in Reports: 03/30/1994 Number of Days to Update: 56 Source: EPA Telephone: 202-564-4267 Last EDR Contact: 08/15/2011 Next Scheduled EDR Contact: 11/28/2011 Data Release Frequency: No Update Planned

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/28/2020 Date Data Arrived at EDR: 11/05/2020 Date Made Active in Reports: 11/25/2020 Number of Days to Update: 20 Source: EPA Telephone: N/A Last EDR Contact: 01/14/2021 Next Scheduled EDR Contact: 04/12/2021 Data Release Frequency: Quarterly

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019 Date Data Arrived at EDR: 04/05/2019 Date Made Active in Reports: 05/14/2019 Number of Days to Update: 39 Source: Environmental Protection Agency Telephone: 703-603-8704 Last EDR Contact: 12/23/2020 Next Scheduled EDR Contact: 04/12/2021 Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/28/2020 Date Data Arrived at EDR: 11/05/2020 Date Made Active in Reports: 11/25/2020 Number of Days to Update: 20 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 01/14/2021 Next Scheduled EDR Contact: 04/26/2021 Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/28/2020 Date Data Arrived at EDR: 11/05/2020 Date Made Active in Reports: 11/25/2020 Number of Days to Update: 20 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 01/14/2021 Next Scheduled EDR Contact: 04/26/2021 Data Release Frequency: Quarterly

Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/14/2020	Source: EPA
Date Data Arrived at EDR: 12/17/2020	Telephone: 800-424-9346
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 12/17/2020

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/14/2020 Date Data Arrived at EDR: 12/17/2020 Date Made Active in Reports: 12/22/2020 Number of Days to Update: 5 Source: Environmental Protection Agency Telephone: 214-665-6444 Last EDR Contact: 12/17/2020 Next Scheduled EDR Contact: 04/05/2021 Data Release Frequency: Quarterly

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020 Date Data Arrived at EDR: 12/17/2020 Date Made Active in Reports: 12/22/2020 Number of Days to Update: 5 Source: Environmental Protection Agency Telephone: 214-665-6444 Last EDR Contact: 12/17/2020 Next Scheduled EDR Contact: 04/05/2021 Data Release Frequency: Quarterly

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/14/2020 Date Data Arrived at EDR: 12/17/2020 Date Made Active in Reports: 12/22/2020 Number of Days to Update: 5 Source: Environmental Protection Agency Telephone: 214-665-6444 Last EDR Contact: 12/17/2020 Next Scheduled EDR Contact: 04/05/2021 Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators) RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020 Date Data Arrived at EDR: 12/17/2020 Date Made Active in Reports: 12/22/2020 Number of Days to Update: 5 Source: Environmental Protection Agency Telephone: 214-665-6444 Last EDR Contact: 12/17/2020 Next Scheduled EDR Contact: 04/05/2021 Data Release Frequency: Quarterly

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

State- and tribal - equivalent CERCLIS

SHWS: Potential and Confirmed Sites List

Confirmed status denotes that assessments have been performed and a determination made that (1) hazardous waste(s) or substance(s) are present at the site and (2) these sites are under the jurisdiction of the LDEQ/RSD. Potential status is an indicator that sites are either waiting to be assessed or the assessment is in progress.

Date of Government Version: 10/07/2020 Date Data Arrived at EDR: 10/09/2020 Date Made Active in Reports: 12/30/2020 Number of Days to Update: 82

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: Landfill List

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 09/02/2020 Date Data Arrived at EDR: 09/15/2020 Date Made Active in Reports: 10/05/2020 Number of Days to Update: 20

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Date Data Arrived at EDR: 03/21/2014 Date Made Active in Reports: 06/17/2014 Number of Days to Update: 88 Source: Environmental Protection Agency Telephone: 617-520-3000 Last EDR Contact: 02/02/2021 Next Scheduled EDR Contact: 05/17/2021 Data Release Frequency: Quarterly

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017 Date Data Arrived at EDR: 05/08/2018 Date Made Active in Reports: 07/20/2018 Number of Days to Update: 73 Source: Environmental Protection Agency Telephone: 703-308-4044 Last EDR Contact: 02/05/2021 Next Scheduled EDR Contact: 05/17/2021 Data Release Frequency: Varies

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 10/19/2020 Date Data Arrived at EDR: 10/19/2020 Date Made Active in Reports: 01/04/2021 Number of Days to Update: 77 Source: EPA Telephone: 202-564-4203 Last EDR Contact: 01/21/2021 Next Scheduled EDR Contact: 05/03/2021 Data Release Frequency: Annually

ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 10/28/2020 Date Data Arrived at EDR: 11/05/2020 Date Made Active in Reports: 11/25/2020 Number of Days to Update: 20 Source: EPA Telephone: 703-416-0223 Last EDR Contact: 01/14/2021 Next Scheduled EDR Contact: 03/15/2021 Data Release Frequency: Annually

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 11/02/2020 Date Data Arrived at EDR: 11/12/2020 Date Made Active in Reports: 01/25/2021 Number of Days to Update: 74 Source: Environmental Protection Agency Telephone: 202-564-8600 Last EDR Contact: 01/19/2021 Next Scheduled EDR Contact: 05/03/2021 Data Release Frequency: Varies

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995 Date Data Arrived at EDR: 07/03/1995 Date Made Active in Reports: 08/07/1995 Number of Days to Update: 35 Source: EPA Telephone: 202-564-4104 Last EDR Contact: 06/02/2008 Next Scheduled EDR Contact: 09/01/2008 Data Release Frequency: No Update Planned

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006 Date Data Arrived at EDR: 03/01/2007 Date Made Active in Reports: 04/10/2007 Number of Days to Update: 40

UMTRA: Uranium Mill Tailings Sites Uranium ore was mined by private companie	s for federal government use in national defense programs. When the mills

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

RGA HWS: Recovered Government Archive State Hazardous Waste Facilities List

The EDR Recovered Government Archive State Hazardous Waste database provides a list of SHWS incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Environmental Quality in Louisiana.

Date of Government Version: N/A Date Data Arrived at EDR: 07/01/2013 Date Made Active in Reports: 01/03/2014 Number of Days to Update: 186 Source: Department of Environmental Quality Telephone: N/A Last EDR Contact: 06/01/2012 Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

RGA LF: Recovered Government Archive Solid Waste Facilities List

The EDR Recovered Government Archive Landfill database provides a list of landfills derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Environmental Quality in Louisiana.

Date of Government Version: N/A Date Data Arrived at EDR: 07/01/2013 Date Made Active in Reports: 01/15/2014 Number of Days to Update: 198 Source: Department of Environmental Quality Telephone: N/A Last EDR Contact: 06/01/2012 Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

RGA LUST: Recovered Government Archive Leaking Underground Storage Tank

The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Environmental Quality in Louisiana.

Date of Government Version: N/A Date Data Arrived at EDR: 07/01/2013 Date Made Active in Reports: 01/03/2014 Number of Days to Update: 186 Source: Department of Environmental Quality Telephone: N/A Last EDR Contact: 06/01/2012 Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals. Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

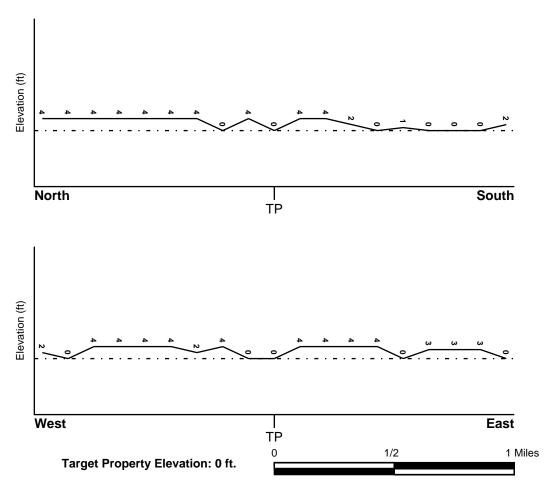

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
2252040655B	FEMA Q3 Flood data
Additional Panels in search area:	FEMA Source Type
2252040675B	FEMA Q3 Flood data
NATIONAL WETLAND INVENTORY	
NWI Quad at Target Property DELACROIX	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:		
Search Radius:	1.25 miles	
Status:	Not found	

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID Not Reported LOCATION FROM TP GENERAL DIRECTION GROUNDWATER FLOW

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA Telephone: 877-336-2627 Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS) This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in *bold italics* are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environmental Quality's Louisiana's Solid Waste Facilities list.

A review of the SWF/LF list, as provided by EDR, and dated 09/02/2020 has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/28/2020 Date Data Arrived at EDR: 11/05/2020 Date Made Active in Reports: 11/25/2020 Number of Days to Update: 20 Source: EPA Telephone: N/A Last EDR Contact: 01/14/2021 Next Scheduled EDR Contact: 04/12/2021 Data Release Frequency: Quarterly

EPA Region 7 Telephone: 913-551-7247

EPA Region 8 Telephone: 303-312-6774

EPA Region 9 Telephone: 415-947-4246

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/28/2020 Date Data Arrived at EDR: 11/05/2020 Date Made Active in Reports: 11/25/2020 Number of Days to Update: 20 Source: EPA Telephone: N/A Last EDR Contact: 01/14/2021 Next Scheduled EDR Contact: 04/12/2021 Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 10/15/1991 Date Data Arrived at EDR: 02/02/1994 Date Made Active in Reports: 03/30/1994 Number of Days to Update: 56 Source: EPA Telephone: 202-564-4267 Last EDR Contact: 08/15/2011 Next Scheduled EDR Contact: 11/28/2011 Data Release Frequency: No Update Planned

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/28/2020 Date Data Arrived at EDR: 11/05/2020 Date Made Active in Reports: 11/25/2020 Number of Days to Update: 20 Source: EPA Telephone: N/A Last EDR Contact: 01/14/2021 Next Scheduled EDR Contact: 04/12/2021 Data Release Frequency: Quarterly

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019 Date Data Arrived at EDR: 04/05/2019 Date Made Active in Reports: 05/14/2019 Number of Days to Update: 39 Source: Environmental Protection Agency Telephone: 703-603-8704 Last EDR Contact: 12/23/2020 Next Scheduled EDR Contact: 04/12/2021 Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/28/2020 Date Data Arrived at EDR: 11/05/2020 Date Made Active in Reports: 11/25/2020 Number of Days to Update: 20 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 01/14/2021 Next Scheduled EDR Contact: 04/26/2021 Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/28/2020 Date Data Arrived at EDR: 11/05/2020 Date Made Active in Reports: 11/25/2020 Number of Days to Update: 20 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 01/14/2021 Next Scheduled EDR Contact: 04/26/2021 Data Release Frequency: Quarterly

Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/14/2020	Source: EPA
Date Data Arrived at EDR: 12/17/2020	Telephone: 800-424-9346
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 12/17/2020

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/14/2020 Date Data Arrived at EDR: 12/17/2020 Date Made Active in Reports: 12/22/2020 Number of Days to Update: 5 Source: Environmental Protection Agency Telephone: 214-665-6444 Last EDR Contact: 12/17/2020 Next Scheduled EDR Contact: 04/05/2021 Data Release Frequency: Quarterly

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020 Date Data Arrived at EDR: 12/17/2020 Date Made Active in Reports: 12/22/2020 Number of Days to Update: 5 Source: Environmental Protection Agency Telephone: 214-665-6444 Last EDR Contact: 12/17/2020 Next Scheduled EDR Contact: 04/05/2021 Data Release Frequency: Quarterly

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/14/2020 Date Data Arrived at EDR: 12/17/2020 Date Made Active in Reports: 12/22/2020 Number of Days to Update: 5 Source: Environmental Protection Agency Telephone: 214-665-6444 Last EDR Contact: 12/17/2020 Next Scheduled EDR Contact: 04/05/2021 Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators) RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020 Date Data Arrived at EDR: 12/17/2020 Date Made Active in Reports: 12/22/2020 Number of Days to Update: 5 Source: Environmental Protection Agency Telephone: 214-665-6444 Last EDR Contact: 12/17/2020 Next Scheduled EDR Contact: 04/05/2021 Data Release Frequency: Quarterly

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 08/06/2020Source: DDate Data Arrived at EDR: 08/21/2020TelephoneDate Made Active in Reports: 11/11/2020Last EDR (Number of Days to Update: 82Next ScherDate Made Active in Reports: 11/11/2020Next Scher

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 12/14/2020 Date Data Arrived at EDR: 12/17/2020 Date Made Active in Reports: 12/22/2020 Number of Days to Update: 5 Source: Environmental Protection Agency Telephone: 214-665-6444 Last EDR Contact: 12/17/2020 Next Scheduled EDR Contact: 04/05/2021 Data Release Frequency: Quarterly

FUDS: Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 09/29/2020 Date Data Arrived at EDR: 11/17/2020 Date Made Active in Reports: 01/25/2021 Number of Days to Update: 69 Source: U.S. Army Corps of Engineers Telephone: 202-528-4285 Last EDR Contact: 11/17/2020 Next Scheduled EDR Contact: 03/01/2021 Data Release Frequency: Varies

DOD: Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005 Date Data Arrived at EDR: 11/10/2006 Date Made Active in Reports: 01/11/2007 Number of Days to Update: 62 Source: USGS Telephone: 888-275-8747 Last EDR Contact: 01/15/2021 Next Scheduled EDR Contact: 04/26/2021 Data Release Frequency: Semi-Annually

FEDLAND: Federal and Indian Lands

Federally and Indian administrated lands of the United States. Lands included are administrated by: Army Corps of Engineers, Bureau of Reclamation, National Wild and Scenic River, National Wildlife Refuge, Public Domain Land, Wilderness, Wilderness Study Area, Wildlife Management Area, Bureau of Indian Affairs, Bureau of Land Management, Department of Justice, Forest Service, Fish and Wildlife Service, National Park Service.

Date of Government Version: 04/02/2018 Date Data Arrived at EDR: 04/11/2018 Date Made Active in Reports: 11/06/2019 Number of Days to Update: 574 Source: U.S. Geological Survey Telephone: 888-275-8747 Last EDR Contact: 01/07/2021 Next Scheduled EDR Contact: 04/19/2021 Data Release Frequency: N/A

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Date of Government Version: 01/01/2017 Date Data Arrived at EDR: 02/03/2017 Date Made Active in Reports: 04/07/2017 Number of Days to Update: 63 Source: Environmental Protection Agency Telephone: 615-532-8599 Last EDR Contact: 11/09/2020 Next Scheduled EDR Contact: 02/22/2021 Data Release Frequency: Varies

US FIN ASSUR: Financial Assurance Information

All owners and operators of facilities that treat, store, or dispose of hazardous waste are required to provide proof that they will have sufficient funds to pay for the clean up, closure, and post-closure care of their facilities.

Date of Government Version: 09/21/2020 Date Data Arrived at EDR: 09/22/2020 Date Made Active in Reports: 12/14/2020 Number of Days to Update: 83 Source: Environmental Protection Agency Telephone: 202-566-1917 Last EDR Contact: 12/17/2020 Next Scheduled EDR Contact: 04/05/2021 Data Release Frequency: Quarterly

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Date Data Arrived at EDR: 03/21/2014 Date Made Active in Reports: 06/17/2014 Number of Days to Update: 88 Source: Environmental Protection Agency Telephone: 617-520-3000 Last EDR Contact: 02/02/2021 Next Scheduled EDR Contact: 05/17/2021 Data Release Frequency: Quarterly

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017 Date Data Arrived at EDR: 05/08/2018 Date Made Active in Reports: 07/20/2018 Number of Days to Update: 73 Source: Environmental Protection Agency Telephone: 703-308-4044 Last EDR Contact: 02/05/2021 Next Scheduled EDR Contact: 05/17/2021 Data Release Frequency: Varies

TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2016 Date Data Arrived at EDR: 06/17/2020 Date Made Active in Reports: 09/10/2020 Number of Days to Update: 85 Source: EPA Telephone: 202-260-5521 Last EDR Contact: 12/18/2020 Next Scheduled EDR Contact: 03/29/2021 Data Release Frequency: Every 4 Years

TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2018	Source: EPA
Date Data Arrived at EDR: 08/14/2020	Telephone: 202-566-0250

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 10/19/2020 Date Data Arrived at EDR: 10/19/2020 Date Made Active in Reports: 01/04/2021 Number of Days to Update: 77 Source: EPA Telephone: 202-564-4203 Last EDR Contact: 01/21/2021 Next Scheduled EDR Contact: 05/03/2021 Data Release Frequency: Annually

ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 10/28/2020 Date Data Arrived at EDR: 11/05/2020 Date Made Active in Reports: 11/25/2020 Number of Days to Update: 20 Source: EPA Telephone: 703-416-0223 Last EDR Contact: 01/14/2021 Next Scheduled EDR Contact: 03/15/2021 Data Release Frequency: Annually

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 11/02/2020 Date Data Arrived at EDR: 11/12/2020 Date Made Active in Reports: 01/25/2021 Number of Days to Update: 74 Source: Environmental Protection Agency Telephone: 202-564-8600 Last EDR Contact: 01/19/2021 Next Scheduled EDR Contact: 05/03/2021 Data Release Frequency: Varies

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995 Date Data Arrived at EDR: 07/03/1995 Date Made Active in Reports: 08/07/1995 Number of Days to Update: 35 Source: EPA Telephone: 202-564-4104 Last EDR Contact: 06/02/2008 Next Scheduled EDR Contact: 09/01/2008 Data Release Frequency: No Update Planned

PRP: Potentially Responsible Parties

A listing of verified Potentially Responsible Parties

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006 Date Data Arrived at EDR: 03/01/2007 Date Made Active in Reports: 04/10/2007 Number of Days to Update: 40

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

RGA HWS: Recovered Government Archive State Hazardous Waste Facilities List

The EDR Recovered Government Archive State Hazardous Waste database provides a list of SHWS incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Environmental Quality in Louisiana.

Date of Government Version: N/A Date Data Arrived at EDR: 07/01/2013 Date Made Active in Reports: 01/03/2014 Number of Days to Update: 186 Source: Department of Environmental Quality Telephone: N/A Last EDR Contact: 06/01/2012 Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

RGA LF: Recovered Government Archive Solid Waste Facilities List

The EDR Recovered Government Archive Landfill database provides a list of landfills derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Environmental Quality in Louisiana.

Date of Government Version: N/A Date Data Arrived at EDR: 07/01/2013 Date Made Active in Reports: 01/15/2014 Number of Days to Update: 198 Source: Department of Environmental Quality Telephone: N/A Last EDR Contact: 06/01/2012 Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

RGA LUST: Recovered Government Archive Leaking Underground Storage Tank

The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Environmental Quality in Louisiana.

Date of Government Version: N/A Date Data Arrived at EDR: 07/01/2013 Date Made Active in Reports: 01/03/2014 Number of Days to Update: 186 Source: Department of Environmental Quality Telephone: N/A Last EDR Contact: 06/01/2012 Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/10/2020 Date Data Arrived at EDR: 10/20/2020 Date Made Active in Reports: 11/02/2020 Number of Days to Update: 13 Source: Department of Energy & Environmental Protection Telephone: 860-424-3375 Last EDR Contact: 11/09/2020 Next Scheduled EDR Contact: 02/22/2021 Data Release Frequency: No Update Planned

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals. Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary

and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools Source: National Center for Education Statistics Telephone: 202-502-7300 The National Center for Education Statistics' primary database on private school locations in the United States.

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA Telephone: 877-336-2627 Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

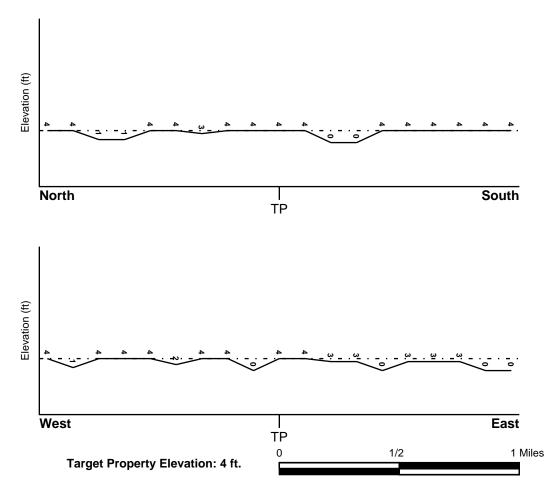

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

	Flood Plain Panel at Target Property	FEMA Source Type

NA	ATIONAL WETLAND INVENTORY	
	NW/I Owned at Tananat Davagents	NWI Electronic
	NWI Quad at Target Property DELACROIX	Data Coverage YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:		
Search Radius:	1.25 miles	
Status:	Not found	

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID Not Reported LOCATION FROM TP GENERAL DIRECTION GROUNDWATER FLOW

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

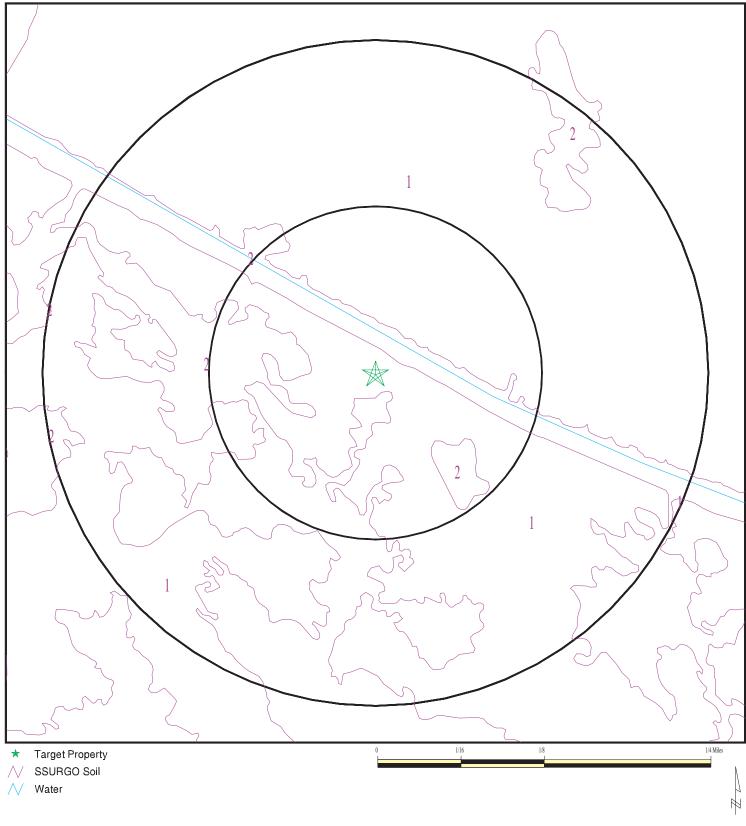

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1	
Soil Component Name:	Lafitte
Soil Surface Texture:	muck
Hydrologic Group:	Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
Soil Drainage Class:	Very poorly drained
Hydric Status: All hydric	
Corrosion Potential - Uncoated Steel:	High
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches

	Soil Layer Information						
	Βοι	Indary		Classification		Saturated hydraulic	
Layer	Upper	per Lower Soil Texture Cla		AASHTO Group	Unified Soil	conductivity micro m/sec	Soil Reaction (pH)
1	0 inches	53 inches	muck	A-8	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0	Max: Min:
2	53 inches	79 inches	clay	A-8	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0	Max: Min:

Soil Map ID: 2	
Soil Component Name:	Water, large
Soil Surface Texture:	muck
Hydrologic Group:	Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
Soil Drainage Class:	

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA Telephone: 877-336-2627 Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS) This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Appendix C User Questionnaire

Phase I USER/BUYER QUESTIONNAIRE (from ASTM E1527 – 13, §X3)

Site Name: <u>North Delacroix Marsh</u>	Creation Project
Site Address: <u>Delacroix, St. Bernard</u>	Parish, LA
User Contact Name: Jessica Diez	Phone: 225-342-1477
Date: 5/13/2021	Please return completed form to michael.jennings@aptim.co

PLEASE USE ADDITIONAL PAGES AS NECESSARY TO ANSWER THE FOLLOWING QUESTIONS:

(1.) Environmental liens that are filed or recorded against the *property* (40 CFR 312.25). Did a search of *recorded land title records* (or judicial records where appropriate, see Note 1 below) identify any environmental liens filed or recorded against the *property* under federal, tribal, state or local law? If yes please describe.

No

NOTE 1—In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

(2.) Activity and use limitations that are in place on the *property* or that have been filed or recorded against the *property* (40 CFR 312.26(a)(1)(v) and

vi)).

Did a search of *recorded land title records* (or judicial records where appropriate, see Note 1 above) identify any AULs, such as *engineering controls*, land use restrictions Or *institutional controls* that are in place at the *property* and/or have been filed or recorded against the *property* under federal, tribal, state or local law? If yes please describe.

No

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

Do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an *adjoining property* so that you would have specialized knowledge of the chemicals and processes used by this type of business? If yes please describe.

No

(4.) Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).

Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*? If yes please describe.

Unknown

(5.) Commonly known or *reasonably ascertainable* information about the *property* (40 CFR 312.30).

Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases?

For example,

(a.) Do you know the past uses of the *property*? If yes please describe.

Marsh land and open water

(b.) Do you know of specific chemicals that are present or once were present at the *property*? If yes please describe.

No

(c.) Do you know of spills or other chemical releases that have taken place at the *property*? If yes please describe.

No

(d.) Do you know of any environmental cleanups that have taken place at the *property*? If yes please describe.

No

(6.) The degree of obviousness of the presence or likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?

Appendix D Environmental Lien Search Report

5881 DORAL CT 5881 DORAL CT SAINT BERNARD, LA 70128

Inquiry Number: 6358870.7S FEBRUARY 12, 2021

EDR Environmental Lien and AUL Search

6 Armstrong Road, 4th floor Shelton, CT 06484 Toll Free: 800.352.0050 www.edrnet.com

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, parish clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business. Please contact EDR at 1-800-352-0050 with any guestions or comments.

Also acquired by Albert Ruiz in an Act of Partition before Alexis Brian, Notary Public, dated November 6th, 1944, and registered in the records of St. Bernard Parish in C.O.B. 49, folio 265.

A CERTAIN TRACT OF LAND situated in the Parish of St. Bernard on the left bank of Bayou Terre aux Boeufs, being all that part of fractional section or Lot No. 31 in Township 14 South, Range 14 East containing approximately 30 acres more or less which is bounded on the south by the dividing line between Townships 14 and 15 South, Range 14 East and on the northwest by the rear line of the property fronting on Bayou Terre aux Boeufs; the said tract being all that part of said fractional section or lot 31 to its full depth which is located immediately in the rear of the property now belonging to said RUIZ and the said lot 31 being so designated on a plan dated April 20, 1919 marked as of property R.J. Becker, Calmar, Iowa annexed to an act of sale before EDGAR GRIMA, Notary Public, on March 8, 1922; and as also appears by a blue print of survey by F.T. Payne, Civil Engineer, annexed to an act of sale before LILIA L. DUBUCH, Notary Public, on February 18, 1927.

A CERTAIN TRACT OF LAND, situated in the Parish of St. Bernard, in this State, in the Sixth Ward, at Bois du Lac, measuring four (4) arpents front by twenty (20) arpents in depth on both sides of Bayou Terre aux Boeufs, arpents in depth on both sides of Bayou Terre aux Boeufs, bounded above by the property now or formerly belonging to the Lake Borgen Basin Levee District, and below by property now, or formerly of J. DeoGracias, together with all the buildings, and improvements thereof and old the rights, ways, privileges, servitudes, advancedes, and appurtenances thereunto belonging or in anywise appertaining, from which tract of leadshis cobe accepted three (3) arpents front on the left descending bank of Bayou Terre aux Boeufs by five (5) urpents in depth, and, therefore, the property herein conveyed measures four (4) arpents front by twenty (20) arpents in depth on the right descending bank of Bayou were aux Boeufs, and one (1) arpent front by a depth of five (5) arpents and then extending four (4) arpents in witch to a depth of fifteen (15) arpents on the left descending bank of Bayou Terre aux Boeufs, which one (A) argent front is taken from the lower line of the property, as appears by pen sketch annexed to act of loguistion by ALBERT RUIZ, executed before LILIA L. Display Notary Public, of date February 28, 1927; MEM Ruke keeps 1/2 the mineral rights and royalty on this land, Mr. Ruiz to have sole right to make mineral leason. bounded above by the property now or formerly belonging

Being the same property acquired by MR. RUIZ from PAUL M. DUTRUCH as par act before LILIA L. DUBUCH, Notary Public, on June 11, 1928, registered in St. Bernard Parish in C.O.B. 49, folio 265.

A CERTAIN TRACT OR TRACTS OF LAND, together with all the buildings, and improvements thereon and all the rights, and advantages servitudes, privileges, ways, thereunto belonging anywise or in appertaining, situated in the parish of St. Bernard, State of Louisiana, in the SWIFT TRACT AND BEING DESIGNATED AS LOTS 35-B and 36-B, in Section 8 Township appurtenances 15 South, Range 15 East, containing 141 acres more or less all as per map of the property of the Delacroix Corporation in St. Bernard and Plaquemines Parishes, Louisiana, compiled from United States Government field notes and survey plats and surveys made by the Delacroix Corporation. Subdivision Nos. 1, 3 and 5 subdivided by G.L. Lord, C.E. and Subdivisions 2 and 4 subdivided by W. E. Wakefield, C.E. Said map having been filed for record in the office of the Clerk of Court for St. Bernard Parish on December 13, 1938.

Being the same property acquired by Mr. and Mrs. Albert Ruiz by purchase from John Deogracias by Act dated January 30, 1931 before A.B. Nunez, N.P., registered in the conveyance records of St. Bernard Parish in C.O.B. 46, folio 147.

Also acquired by Albert Ruiz in an Act of Partition before Alexis Brian, Notary Public, dated November 6th, 1944, and registered in the records of St. Bernard Parish in C.O.B. 49, folio 265.

A Certain Tract of Ground, Parish of St. Bernard, Southern land district of La., in Township Eleven South, Range Seventeen East, Fractional Section No. 22, (105) acres more or less; Fractional Section No. 25, (85) acres more or less; Fractional Section No. 26, (480) acres more or less; Fractional Section 27, (580) acres more or less; Fractional Section No. 28, (30) acres more or less; Fractional Section No. 33, (160) acres more or less; Fractional Section 34, (640) acres more or less; Fractional Section 35, (600) acres more or less; Fractional Section 36, (570) acres more or less; Total acres 3,250 more or less.

Being the same property acquired by Admiral C. Vaughan, Sr. by Judgment of Possession in the Succession of Evi Vaughan, no. 8445 of the 25th Judicial District Court, which Judgment was dated September 26, 1361 and signed by the Honorable Bruce Nunez, Judge, and Scorded in COB 79, folio 540 in the Parish of St. Bernard, said property is also by the said Judgment subject to the usufruct in favor of the widow of Evi Vaughan, Dimely, Mrs. Lucille Perez.

A CERTAIN TRACT OF HAND, together with all the buildings and improvements thereon and all the rights, ways, privileges, servitades advantages thereunto belonging or in anywise (Dearthining, situated in the Parish of St. Bernard, State of Lowisiana, on the left bank of Terre Aux Boeufs, comprising Lots 42, 43, and 44, inclusive, in Township 35 South, Range 14 East, on a plan dated April 30, 1919, ennexed to an act passed before Emile Pomes, Notary Public dated February 6, 1923 and which said lots contain the following acreage, to wit:

Lot 42 contains 53 acres; Lot 43 contains 43 acres; Lot 44 contains 39.5 acres.

LESS AND EXCEPT:

A strip extending 6 acres more or less, along Bayou Terre aux Boeufs, 210 feet in depth between parallel lines, taken from the western one-half (1/2) of Lot 42. This strip includes all of said Lot 42 between its western boundary, said Bayou Terre Aux Boeufs Road, and a line 210 feet distant from the parallel with said road, except a piece of ground 25 feet on said road by 210 feet deep at the southwest corner of said lot, which is included in the remainder of Lot 42 hereby sold.

Being the same property acquired by Anna Ritter, divorced wife by first marriage of Evi Vaughan and wife by second marriage of Albert Ruiz, in an Act of Partition executed on November 6, 1944, before Alexis Brian, Notary Public, and recorded in the conveyance records of St. Bernard Parish in COB 49, folio 265.

THREE CERTAIN LOTS OF GROUND, together with all the buildings and improvements thereon and all the rights, ways, privileges, servitudes, advantages, and prescriptions thereunto belonging or in anywise appertaining, situated in the Parish of St. Bernard, State of Louisiana, and that part thereon known as FRISCOVILLE SUBDIVISION, in Square No. 103, bounded by La. State Highway No. 1., LeBeau Avenue, the right of way of the Southern Railroad Co., which said three lots are designated by the Numbers Eight, Nine and Ten (8, 9 and 10) on a plan by Adloe Orr, Civil Engineer, dated June 29, 1945, a copy of which is annexed to an act of sale before William F. Roy, Notary Public, dated December 31, 1945, and measure, each, thirty-three and sixteen one hundredths feet (33.16') front on La. State Highway No. One (1), the same width in the rear, by a depth of one hundred and twenty feet (120') feet; said three lots adjoin each other.

LESS AND EXCEPT:

One residence built thereon with the separate funds of A. Sweeney Foret and acknowledged by Evi Vaughan by affidavit executed before Edwin M. Roy, Notary Public, and dated May 28, 1952, and registered in COB 56, folio 99 of the Parish of St. Bernard, to buy the property of A. Sweeney Foret.

522

A CERTAIN LOT OF GROUND, together with all the buildings and improvements thereon, and and the rights, ways, privileges, servitudes and advantages thereunto belonging or in anywise appertaining, situated in the Parish of St. Bernard, State of Louisiano, in their part known as the FRISCOVILLE SUBDIVISION in Square No. 103, all as shown on plan of survey by Coren & Robert, Civil Engineer and Surveyor, dated Septable 22, 1953, copy of which is annexed to vendor's citle, and according to which said plan of survey said lot of ground herein sold is designated as Louisers, and begins at a point on the rear of boundary like of Lot No. 10 of said Square No. 103 running in a northerly direction to the right of way of the Southern Sailuby a distance of 108.92 feet; thence, along said right of way a distance of 171.83 set to the line of Lot Nos. 8; thence in an easterly direction along the rear lines of Lot Nos. Eight (8), Nine (9) and Ten (10) presently owned by the purchasers herein, a distance of 99.48 feet to the point of beginning, all as shown on the aforesaid plan of Corwin A. Robert, C.D. and Surveyor. AND SELLERS WAIVE THE PRODUCTION OF CURRENT CONVEYANCE. MORTGAGE CERTIFICATES. TAX CERTIFICATES AND CURRENT SURVEY AND RELIEVE AND RELEASE THE UNDERSIGNED NOTARY FROM ANY AND ALL LIABILITY AND RESPONSIBILITY IN CONNECTION THEREWITH.

NOW COMES, Owen McManus, Sr., husband of purchaser who declared that the property acquired herein is the separate and paraphernal property of his wife, under her separate administration and control.

THUS DOME AND SIGNED, at Chalmette, Louisiana, on the day, month and year hereinabove first written, in the presence of the undersigned competent witnesses who hereunto subscribe their names with the said appearers after a reading of the whole. WITNESSES:

EDR Environmental Lien and AUL Search

6 Armstrong Road, 4th floor Shelton, CT 06484 Toll Free: 800.352.0050 www.edrnet.com

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, parish clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business. Please contact EDR at 1-800-352-0050 with any guestions or comments.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING. WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2020 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc. or its affiliates is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Resumes

Michael Jennings Project Manager Aptim Environmental & Infrastructure

Education

- MS, Environmental Policy and Management, University of Denver, Denver, Colorado, 2002
- BA, Business Administration, Accounting, University of Alabama, Tuscaloosa, 1993

Highlights

- 22 years experience in the areas of auditing, environmental management, and program management
- Senior environmental manager/compliance specialist responsible for facility permitting, regulatory compliance, and environmental site assessments for commercial clients.

Registrations

Certified Public Accountant (CPA), Inactive, Alabama, 1995

Training OSHA 40-Hour HAZWOPER, 2003-Current

Relevant Experience

Mr. Jennings has performed EHS compliance audits, power plant environmental liabilities studies, facility closure, soil and groundwater remediation, worked with regulators, environmental site assessments, asbestos/lead surveys, soil/groundwater sampling, NEPA studies, environmental management systems, SPCC plans, regulatory assistance, environmental accounting and sustainability reporting.

Auditor, EHS Complaince Audit, Safeway, Various Locations.

Performed EHS compliance audits of 8 Safeway beverage, bread, ice cream and milk plants located in Colorado, Oregon, Texas and Washington. Topics included all environmental media plus OSHA compliance and management systems. Provided reports with detailed table of findings and presented findings and recommendations to corporate representatives.

Auditor, EHS Audits, Crystal Rock, Various States.

Performed environmental, health and safety compliance audits of water bottling plants located in MA, NY and VT. Audits included compliance with federal, state and local regulations in addition to company policies. Submitted reports detailing audit findings and provided recommendations and strategies for correcting deficiencies at the plants.

Auditor, EHS Audits, DS Waters, Various States.

Performs environmental, health and safety compliance audits of water bottling plants, distribution facilities and fleet shops around the country. Has completed nearly 60 locations to date. Audits include compliance with federal, state and local regulations in addition to company policies. Responsible for submission of reports detailing audit findings and providing recommendations and strategies for correcting deficiencies at the plant.

Auditor, EHS Compliance Audits, Best Buy, Various States.

Performs environmental, health and safety compliance audits of supply chain facilities (warehouses), repair depots and retail stores across the county for Best Buy. Develops gap assessment programs for each facility to assist in achieving compliance.

Auditor, Environmental Audit, Genessee & Wyoming Railroad, Provo, Utah.

Performed an environmental audit of the GWI facility located in Provo, UT. The major activities and operations performed at the facility included locomotive maintenance and service operations, car repair, and flat switching of railcars. The primary topics reviewed included AST management, SPCC plans, wastewater discharges, stormwater discharges, hazardous/universal waste management and air emissions.

2

Auditor, EHS Compliance Audits, Cingular/RCC, Various States.

Managed and participated in a project to perform EHS compliance audits for multiple facilities for Cingular Wireless and Rural Cellular Corporation. Project specifics included developing audit checklists applicable to the client's operations, managing staff and resources, preparing audit reports, presenting audit findings to the client, and training the client's employees on EHS issues.

Auditor, Environmental Compliance, Qwest, Colorado

Performed environmental compliance audit of Qwest fleet shops and work centers across Colorado. Focus was primarly on hazardous/universal waste management, wastewater and air emissions.

Auditor, EHS Compliance Audit, Lamb-Wesson, Idaho Falls, ID.

Performed a comprehensive environmental audit for a Lamb-Wesson potato processing facility in Idaho.

Auditor/Trainer, BSI 18001 Auditing/Training, Trus Joist, Various States

Participated in a project to help implement the BSI 18001 Safety Management System at Trus Joist facilities in West Virginia, Kentucky, Minnesota and Ontario. Specific tasks included training Trus Joist internal auditors on the requirements of BSI 18001 and auditing techniques and conducting in progress and readiness audits of the Safety Management System implementation.

Auditor, Environmental Compliance Audits, Various Clients and Facilities

In addition to the projects listed, Mr. Jennings has performed environmental compliance audits for 7-Eleven stores, the Oglebay Norton sand processing facility, ConAgra flour mills, Contibeef feed lot, and Safeco data center all in Colorado.

Auditor/Trainer, DOT Compliance, Confidential Client, CO/KY/SC/NC.

Trained managers, co-managers, supervisors and

associates on the proper DOT and company policies and procedures for shipping hazardous materials and general products to return centers. Held opening meetings with staff to explain procedures and gave demonstrations. Conducted audits of packages prepared for shipment and made corrections as needed. Documented observations and findings in hand-held computer for download into database for reporting. Held closing meetings to go over observations and made recommendations for future performance. Also, performed hazardous waste compliance audits at the facilities.

Pacificorp, Power Plant Demoliton Studies, Utah and Wyoming

Performed the environmental cost and liability portion of demolition studies for four coal-fired plants. Specific tasks included determining asbestos abatement costs, required permits/plans, hazardous and universal was te disposal costs, pond and landfill closure requirements and costs, and potential liability and costs associated with actually known and potential contamination in soil and groundwater.

Global One, Kammer Power Plant Demolition Study, West Virginia

Performed the environmental cost and liability portion of demolition studies for the Kammer coalfired plant. Specific tasks included determining asbestos abatement costs, required permits/plans, hazardous and universal waste disposal costs, and potential liability and costs associated with actually known and potential contamination in soil and groundwater. A Phase I ESA was also performed at the Kammer plant for due diligence purposes.

NVEnergy, Reid Gardner Station Demolition, Moapa, Nevada

Manages the environmental aspects of the demolition of the coal-fired power plant. Responsible for putting together the environmental portion of the bid documents, permitting, hazardous and universal waste disposal, construction safety, radiation safety, and stormwater plans. Manages an onsite staff who work with both the client and demolition contractors to ensure all applicable regulations are followed during the project. Also responsible for tracking waste disposal and recycling.

State Lead, New Facility Permitting, Confidential Client, Various States.

Participates and manages a comprehensive environmental program for a large retail client covering Colorado, Nevada, Utah and Wyoming. Program in includes review of architectural and mechanical design specifications to ensure compliance with regulations, permitting of new facilities, site inspections, development of SPCC plans and training site managers and key personnel on environmental requirements. For each new site research covers federal, state and local regulatory requirements in the areas of storage tanks, water discharges, wastewater, hazardous waste, universal waste and air emissions. Permit, registration and notification packages are completed and submitted to the client for submission to the appropriate agency. Another key task is responding to agency inquiries and questions on behalf of the client. Entire program involves constant communication between design managers, construction managers, contractors, architects, engineers and the client's environmental compliance and licensing staff.

Project Manager, Colorado Data Center, Confidential Client, Colorado Springs, CO.

Responsible for obtaining all required permits and registrations for the construction of new data center. Permits include air for emergency generators, ASTs and USTs, SPCC plans, hazardous materials storage and chiller registration. Developed and presented a training package for site employees to remain in compliance with required permits.

Project Manager, CXO Demolition, Hewlett-Packard, Colorado Springs, CO.

Provided construction oversight and management of environmental aspects as owner's representative for the demolition of an 800,000 square foot facility. Duties include identification of asbestos containing materials, assuring areas are propertly abated, hazardous and universal waste segregation and disposal, tracking of landfill diversion rate, permit cancellations, removal of USTs and various duties to ensure the project remained in compliance with all applicable regulations. The project achieved a landfill diversion rate of 96%.

Project Manager, Hooper Gas Station Remediation, Canal Insurance, Hooper, UT.

The former Hooper Country Store had numerous spills and leaks from fueling station operations in the early 1990's and remains contaminated in both soils and groundwater. Mr. Jennings took over the project at the request of the client to expedite clean-up and closure. The work performed since taking over the project include a site wide assessment to delineate the contamination including soil and groundwater sampling, site geology and site chemistry; quarterly groundwater monitoring and reporting; excavation of contaminated soils on the site and adjacent properties; treatment of contaminated soils and groundwater with Fenton's reagent; and holding public and stakeholder meetings to present site status and future plans. As the result of site activities since taking over the project, petroleum contaminant levels have declined by over 200% and all but two monitoring wells are now in compliance with state clean-up levels.

Project Manager, Environmental Consulting, Hewlett-Packard, Fort Collins and Colorado Springs, CO.

Serves as the environmental consultant for the HP plants in Ft Collins and Colorado Springs. Performed and/or managed projects including obtaining an air permit for a new data center in Colorado Springs, developing procedures update confined space entry procedures and maps and noise monitoring.

Project Manager, Tank/Battery Removal, American Tower, Various Locations.

Managed the removal of lead acid batteries, aboveground storage tanks and diesel fuel from American Tower cell sites in across the country. Managed staff and resources, contracted with disposal vendors, and provided final disposal documentation and reporting to the client.

Project Manager, Groundwater Remediation and Ongoing Monitoring, Praxair, Walden, CO.

Managing the ongoing monitoring of a remediation of petroleum contaminated groundwater at a client site. He represents the client in meetings with state regulators, submits corrective action plan documents, and manages remediation contractors and confirmation sampling. The remediation portion of the project was completed well under budget and ahead of schedule.

Project Manager, Environmental Consulting, Norgren, Littleton, CO.

Serves as the environmental consultant for the Norgren plant in Littleton, CO. Performed and/or managed projects including Phase I and II Environmental Site Assessments, annual Tier II and TRI reporting, indoor air quality studies, mold assessments, safety training matrix, and preparation and submission of wastewater discharge permits.

Project Manager, UST Removal, Norgren, Littleton, CO.

Managed the project to removed a 40,000 gallon diesel UST and associated piping. The UST formerly provided fuel for the onsite boilers. Tasks including hiring contractors, acquiring required permits, developing safety plans and oversight of tank and piping removal. Line leaks were discovered during pressurized testing of the fuel lines and contaminated soils were removed in those areas.

Project Manager, Stormwater Permits and Plans, DS Waters, Various sites in California.

Currently managing a project to develop stormwater permits and plans for 4 bottled water processing plants in California. Specific tasks included initial site inspections, development of corrective action lists and best management practices, creating a stormwater training presentation and follow-up inspections to ensure corrective actions were completed train plant staff on stormwater management procedures. **Project Manager, Due Diligence, Intel,** **Colorado Springs, CO.**

Managed the due diligence project for the closure of the Intel Fab 23 campus. Project scope included Phase I and II environmental assessments, including groundwater and soil sampling, wipe sampling, lead-based paint sampling and asbestos sampling. The project required several meetings with state regulators to discuss off-site impacts. Provided Intel with recommendations on facility closure with regards to noted environmental issues.

Project Manager, SPCC Plans, DS Waters, Nationwide.

Managed the preparation of SPCC plans for 8 bottled water manufacturing plants and distribution facilities in the eastern and southeastern U.S. Project specifics included development of a SPCC plan template, scheduling staff, monitoring financials, conducting site visits and training the client's employees. All SPCC plans were prepared on schedule and under budget.

Project Manager, Intel FCDC Lead Dust Mitigation, Intel, Ft Collins, CO.

Managed a construction project to demo various items and decontaminate the former Celestica facility to lead dust levels below HUD standard of 40 ug/sqft.

Accomplishments:

Completed project on schedule and under budget. All final confirmation samples cleared the clean-up standard.

Project Manager, Intel IQ1 Due Diligence, Intel, Colorado Springs, CO.

Managed and participated in the due diligence for the decommissioning of an Intel facility in Colorado. Prepared the Phase I environmental site assessment and managed the collection of soil, wipe, and air samples and surveys for asbestos and lead-based paint throughout the facility. Other tasks included the development of a health and safety plan, final report, and detailed EHS recommendations for decommissioning equipment.

Project Manager, SPCC Plan, Confidential Client, Various States.

Managed and participated in a project to prepare 119 SPCC plans over a three-month period for a large retail client. Project specifics included assisting in the development of a SPCC plan template, scheduling staff, monitoring financials, conducting site visits and training the client's employees. All SPCC plans were prepared on schedule and under budget. Also, conducted site visits and prepared SPCC plans at 15 sites in Colorado, Utah and Wyoming for Broadwing Communications.

02/2001 - 07/2002 Senior Environmental Manager, Cingular Wireless, Atlanta, Georgia

Responsible for all aspects of the corporate environmental management program. Managed and trained a staff of Environmental Analysts that reviewed and approved over 3,000 Phase I and II Environmental Site Assessments, NEPA studies, and asbestos/lead surveys annually. Created an environmental management system from merger of 10+ wireless companies. Established and trained a network of environmental market coordinators. Filed environmental permits and registrations for company facilities and operations. Reviewed new and changing regulations at the federal, state and local levels for impact to company operations. Provided oversight of spill response and remediation projects. Major accomplishments included:

06/1995 - 01/2001 EHS Internal Audit Manager, BellSouth Corporation, Atlanta, Georgia

Responsible for performing and managing EHS and operational audits for all corporate entities and subsidiaries, including the telephone company, cellular markets, entertainment entity, printing and publishing group, and aviation operations. Developed risk assessments, gap analyses, audit programs, summary reports and process improvement recommendations for clients. EHS audits included compliance with environmental and safety regulations, evaluation of EHS management system, facility inspections, and job observations for safety performance. Reviewed Phase I and II Environmental Site Assessments and NEPA studies for site acquisition. Managed company wide environmental audit under EPA's self-disclosure audit policy. Defined EHS management system requirements for entities, created audit checklists for audit clients, trained auditors and clients on EHS issues, and coordinated communication among EHS contacts throughout BellSouth
