MEMORANDUM

September 9, 2016

To: Reneé McKee, Project Support

Through: Garvin Pittman, Project Manager

Through: John Troutman, Regional Operations Manager

Through: Peter Hopkins, P.E., Engineer Supervisor

From: Luke Prendergast, P.E., Construction Manager

Subject: Bayou Bonfouca Marsh Creation Project (PO-104)
Purchase Order # 2000198127
Change Order #1

Enclosed for processing is Change Order #1 to amend the contract for the above referenced project. See enclosure for a detailed description of the change order. This change order will increase the contract price from $16,842,116.85 to $16,864,616.85. This increase of $22,500 would allow for the addition of bid item #12, Instrumented Settlement Plates (3 quantity) and a reduction of bid item #6, Settlement Plates (3 quantity). The change order will not change the contract time. The change order is recommended by the Project Engineer and Construction Manager and has been signed by the contractor, Weeks Marine.

Contract File
CHANGE ORDER NO. 1

OWNER: Coastal Protection and Restoration Authority (CPRA)
CONTRACTOR: Weeks Marine, Inc. (WMI)
PROJECT: Bayou Bonfouca Marsh Creation Project (PO-104)
PURCHASE ORDER NO: 2000198127

The following changes are hereby made to the Contract Documents:

- Increase in Contract Price due to the addition of Bid Item No. 12, “Instrumented Settlement Plates.” Three (3) Instrumented Settlement Plates will be installed in Marsh Creation Area 2 at a cost of $30,000.00.
- Reduction in Contract Price for Bid Item 6, “Settlement Plates” from $20,000.00 to $12,500.00 due to a corresponding decrease of three (3) Settlement Plates in Marsh Creation Area 2.

Description:
The Contractor (WMI) will provide all necessary materials, equipment, and labor to fabricate and install three (3) instrumented settlement plates in accordance with the attached plans and specifications. WMI will provide on-site transportation for all CPRA and consultant personnel ancillary to the installation and monitoring of the instrumented settlement plates during construction of the PO-104 project.

Attachments (list documents supporting change):
- Summary of Change Order No. 1
- Revised Plan Sheets 12A & 15
- Technical Specification TS-251 INSTRUMENTED SETTLEMENT PLATES

TS-251 INSTRUMENTED SETTLEMENT PLATES

251.1 **Scope:** The Contractor shall furnish all of the materials, labor and equipment necessary to construct, install, survey and maintain three (3) instrumented settlement plates in accordance with the Plans and these Specifications.

251.2 **Materials:** The base plate for each settlement plate shall be fabricated with a six (6) foot by six (6) foot by one-fourth (1/4) inch thick steel plate. A two and seven-eighths (2-7/8) inch diameter hole shall be drilled or cut through the center of the base plate for installation of the riser pipe. The heads of four (4) one-eighth (1/8) inch diameter by one (1) inch long stainless steel bolts shall be tack-welded onto the top of the base plate for installation of the pressure cell as shown on the Plans.

The riser pipe for each settlement plate shall be two and one-half (2.5) inch nominal diameter Schedule 40 steel pipe that is ten (10.0) feet long. The riser shall be inserted two (2) feet through the hole in the center of the base plate and welded using a 3/16" continuous fillet.
The housing for the multiplexer/node on each settlement plate shall be fabricated from a twelve (12) inch long section of twelve (12) inch diameter Schedule 40 steel pipe. The top of the housing shall be fitted with a non-threaded PVC cap. The bottom of the housing shall be fabricated from twelve (12) inch diameter by three-sixteenths (3/16) inch thick steel plate. A one and one-half (1.5) inch diameter hole shall be drilled four (4) inches from the center of the housing plate for installation of the instrumentation cables. The bottom of the housing plate shall be welded to the top of the riser pipe and housing pipe using a three-sixteenths (3/16) inch continuous fillet.

A three (3) inch diameter perforated PVC Schedule 40 pipe that is eight (8.0) feet long shall be fastened to the riser pipe using plastic wire straps. PVC threaded caps and fittings shall be attached to either end of the pipe. Twenty (20) Mesh T-304 sixteen-thousandths (0.016) inch stainless steel wire cloth shall be wrapped around the outside of the pipe and fastened with plastic wire straps. The pipe shall be filled with sand having a gradation equal to 100% retained by the No. 18 sieve (1 mm).

The Engineer shall be allowed to inspect the instrumented settlement plates and verify that the instrumentation can be properly installed a minimum of one (1) month prior to installation.

251.3 Zinc Coating: A zinc coating shall be applied in a manner and thickness quality conforming to ASTM A 123. In any case where the zinc coating becomes damaged, the damaged area shall be re-galvanized with a suitable low-melting zinc base alloy as recommended by the American Hot-Dip Galvanizers Association. One coat of a vinyl wash primer followed by a red top coat shall be applied over the zinc coat. All painting shall conform to the latest edition of the LA DOTD Standard Specification Section 811 and 1008, or approved equivalent.

251.4 Instrumentation: The instrumentation shall be delivered to the Engineer a minimum of one (1) month prior to installation of the instrumented settlement plates and shall become the property of the Owner upon delivery. The Engineer shall install the instrumentation concurrent with the installation of the settlement plates in the field by the Contractor. The instrumentation shall include the following:

251.4.1 Three (3) vibrating wire earth pressure cells/transducers with fourteen (14) foot cables (Geokon Model 4810-170KPA, or approved equal);

251.4.2 Three (3) vibrating wire piezometers with eleven (11) foot cables (Geokon Model 4500AL-70KPA, or approved equal);

251.4.3 Three (3) vibrating wire drive point piezometers with twenty-five (25) foot long cables (Geokon Model 4500DP-1-170KPA, or approved equal);
251.4.4 Three (3) vibrating wire drive point piezometers with twenty-nine (39) foot cables (Geokon Model 4500DP-1-170KPA, or approved equal);

251.4.5 Fifteen (15), five (5) foot long drive point rods with nine (9) male-to-male connectors (Geokon Model 4500DP-2, or approved equal);

251.4.6 One (1) wireless data acquisition network supervisor with antenna extender (Geokon Model 8800-2-2A, or approved equal);

251.4.7 Three (3) wireless data acquisition sensor nodes with antenna extenders (Geokon Model 8800-1-2A, or approved equal);

251.4.8 Three (3) eight (8) channel multiplexers (Geokon Model 8800-8-1, or approved equal);

251.4.9 Three (3) two (2) foot multiplexer cables (Geokon Model 8032-5v & 05-37512-E, or approved equal);

251.4.10 Fourteen (14) D-size 3.6 volt, 17Ah lithium batteries;

251.5 Installation: The instrumented settlement plates shall be installed at locations approved by the CPRA Engineer a minimum of two (2) weeks prior to fill placement in order for the CPRA Engineer to install the instrumentation. Leveling of the base plate shall be accomplished by removing the minimum amount of earth necessary to produce a level foundation. Leveling of the base plate by the addition of any material will not be permitted.

251.6 Monitoring: The Engineer shall be responsible for programming the data logger to obtain measurements from the pressure cell throughout placement of fill until one (1) month after fill placement is complete. The Contractor shall provide boat transportation to the Engineer in order to access the data logger at any time during this monitoring period.

251.7 Maintenance: The Contractor shall maintain all settlement plates until Acceptance of the marsh creation areas. Damages to settlement plates and associated instrumentation shall be immediately repaired or replaced and resurveyed by the Contractor at no expense to the Owner.

251.8 Ratio of Effort: Ninety (90) percent of the Contract cost for this bid item will be paid to the Contractor after installation of the instrumented settlement plates. The remaining ten (10) percent will be paid to the Contractor upon Acceptance of the marsh creation areas.
251.9 Measurement of Payment: Payment shall be made for the Contract lump sum price for "Instrumented Settlement Plates". Payment shall constitute full compensation for furnishing the material, labor, equipment and other incidentals related to this item of the Work. No payment shall be made for instrumented settlement plates that are rejected or damaged due to fault or negligence by the Contractor.
